

*From WILLIAM FRASER, Esq., M.D., Professor of the Institutes of
Medicine, McGill College; one of the Attending Physicians of the
Montreal General Hospital.*

I have known Dr. John Bell as a Student attending my lectures at the McGill College, and as Apothecary at the Montreal General Hospital.

He is, in my estimation, a young man of good general abilities, well acquainted with all the branches of his profession, and quite competent to fill the situation of House Surgeon to the Hospital, now vacant by the resignation of Dr. Drake.
