MONTREAL.

Syrup of Pine Tar & Spruce Gum !

The proprietors have great pleasure in introducing this invaluable remedy to the public. It is a *bona fide* SYRUP OF CANADIAN PINE TAR AND SPRUCE GUM, the component elements of which have been combined in a SOOTHING AND HEALING SYRUP by a process now for the first time discovered.

Its action is EXPECTORANT, ALTERATIVE, SUDORIFIC, SEDATIVE, DIAPHORETIC and DIURETIC, thus rendering it a specific at once safe and effective in all diseases of the THROAT AND LUNGS.

THE CURATIVE PROPERTIES of the gums of the *conifera* or *cone-bearing* trees of our Canadian forests, have been long known. The Indians were familiar with the virtues of these balsamic exudations before the discovery of the country by Europeans, and the early settlers learned from them the use of PINE, SPRUCE and kindred gums for THE CURE OF THROAT and PULMONARY AFFECTIONS. The component elements of this remedy and mode of preparing it have been examined by prominent members of the Medical Faculty, and they have given it their most unqualified and unprejudiced approval. Want of space alone prevents us from giving some of the many testimonials every day received, attesting its virtues and the wonderful cures effected by it. Manufactured by

THE SYRUP OF PINE TAR AND SPRUCE GUM COMPANY,
ARNPRIOR, CANADA.

(Trade Mark Secured.)
