BRAITHWAITE'S RETROSPECT;

A HALF-YEARLY JOURNAL OF
PRACTICAL MEDICINE AND SURGERY.

Part XXXI., July, 1855, Now Ready

CHANGE OF PROPRIETORSHIP AND IMPROVEMENT OF THE WORK.

Uniform American Edition.

TERMS—TWO DOLLARS A YEAR—POSTAGE FREE.

This invaluable compendium, which was commenced in 1840, and has now reached its Thirty-First Number, with the unqualified approbation of the profession, and a very extensive patronage of non-medical readers, has recently passed into the hands of Messrs. STRINGER and TOWNSEND, its present *Proprietors*. It will hereafter be issued by them *simultaneously* with the London edition, by virtue of an arrangement entered into for the advance proof sheets, with the distinguished author, and will appear regularly on the first days of January and July respectively, in a greatly improved form as regards both paper and typographical execution; these, with the gradual enlargement of the work, and the obligation of the new postage-law, have made the trifling advance on the former price of subscription necessary. The work itself is so well known to the public in general that it is almost needless to enter into any lengthened description of it. It constitutes a condensed register of medical facts and observations for the past year, and a complete retrospect of all that is valuable and worth possessing respecting the treatment of disease, gleaned from the British and foreign medical journals, and the transactions of the different societies and associations, and presented to the reader in as condensed a form as possible, and generally in the words of the respective authors.

To medical men the great advantage offered by the RETROSPECT is its embodying, in a confined space, all the cream of all the medical periodicals, sparing them the labor of wading through many volumes filled with much trivial and uninteresting matter, which must be perused in order to reach what is really valuable; and supplying them with a key, by aid of which they may find precisely what they require in any of the scattered publications of the day. To families and private individuals it is scarcely less valuable than to the professional reader—since, although purely and in the highest degree scientific, its contents are yet presented in a style so simple and unaffected that they are comprehensible to any ordinary intellect.

This admirable digest enjoys, throughout the world, a higher fame in its department, and has a more extensive patronage, than was ever acquired by any other periodical publication.
