## The "Canadian" Over Log Saw Gruide

Your Mill would make more moncy if you would make more lumber from the same quantity of logs. You can doit by using a thinner saw, and you can use a thinner saw with one of my Patent Over Loog Saw Guides. The are adaped to either Stationary or Portable Saw Mills, Re-sawing Machines, \&c, \&c. The illustration shows one of my Portuble Saw Mills equipped with this Guide and carrying a saw 60 in. diameter, 12 guage. All my Portable Mills will take saws up to $i_{2}$ in diameter, and this guide will take saws from 36 to 72 in. diameter. It is adjustable every way. I am prepared to fill orders for complete Circelar Saw Mill Outfits, or will make the guide to fit any ordinary existing saw frame.

P.S-- My United States Patent is For Sale.

## THE LEFFEL AND VULCAN TURBINES

 POSSESS distinctive merits, which should have the attention of water power owners ist -They are strongly and carefully built. end -They are economical in their use of water. 3rd-They developmore power in proportion to the water used than any other Turbine built. Mr. J. D. Flavelle, of the Flavelle Milling Co., of Lindsay, writes us under date of March 7 th as fullows:"Referring to the two $74^{4}$ water wheels (Leffels) purchased from you during the past year. As far as we have had an opportunity of testing, they have done their work excellegntly, in fact
 are doing more than you guaranteed them for. We took a test of the power they were developing with a head of water of 3 ft. 10 in , and they developed very close to 100 h . p. We are thoroughty satisfied with same."
