

## Hunting and Shooting

The Vernon district is particularly favored in this respect and offers great attraction to the sportsman. Owing to wise precautions taken by the provincial government an abundance of feathered game has been preserved to the settler and sportsman, including many varieties of grouse, prairie chicken, duck, geese, partridge, etc. In the more mountainous districts, within easy access of Vernon, are to be found all varieties of large game such as are usually found in

the Rocky Mountain district, including species of deer, caribou, mountain goat, bear, mountain lion, etc.

The angler has also every opportunity to indulge in his pastime within easy reach of Vernon. In both Long and Okanagan Lakes, trout and other fish abound, and in the mountain streams the speckled beauties furnish the necessary incentive for many a good day's outing.
