

To the well informed Canadian reader repetition is unnecessary as the general public will find in the brochure of Dr. Stokes such a treasure of ideas, thoughts and practical applications that they are confidently recommended for serious perusal with the hope that they may find each and practical application in the crusade against venereal disease to which Dr. Stokes' efforts have been so well and ably directed.

With grateful acknowledgement to the author for the courtesy extended for the publication of this Canadian edition.

JOHN A. AMYOT,
Deputy Minister,
Department of Health.
