Many New Companies Floated in the West-Smelter for Ironsides and Knob Hill.

The flotation of new mining companies continues to be the feature of the mining stock market of the west. Within the past week or two not less than 12 new mining corporations have been formed, and more or less successfully floated, in Spokane, Wash., alone. The capitalization of the companies varies from \$50,000 to much larger sums, and the prospective scenes of operation of the companies are Camp Republic, Washington, and the Boundary district of British Columbia.

To Rush the Smelter.

It is stated that work will soon be started upon the erection of a 400-ton smelter at Greenwood. It will be remembered that a started from the companies will be remembered that a started from the companies and the started from the companies of a 400-ton smelter at Greenwood. It will be remembered that a started from the companies and the started from the criston of a 400-ton smelter at Greenwood. It will be remembered that a started from the companies and the started from the criston of a 400-ton smelter at Greenwood. It will be remembered that a started from the criston of a 400-ton smelter at Greenwood. It will be remembered that a started from the criston of a 400-ton smelter at Greenwood. red upon the erection of a 400-ton smelter at Greenwood. It will be remembered that company was some time ugo formed for the company was some time ugo formed for the correction of such a plant, but up till now morning have the plant, but up till now morning have the morning have the morning have the morning have the head of the venture. It is state the head of the venture. It is state to be the intention of the company to complete this smelter as soon as possible, in summer.

In this connection it might be interesting to note that the development work on the Old Ironsides and Knob Hill continues are summer.

In this connection it might be interesting to note that the development work on the Old Ironsides and Knob Hill continues are summer.

In this connection it might be interesting to note that the development work on the Old Ironsides and Knob Hill continues are summer.

In this connection it might be interest. The crosscut at a state of the propert. The mineral is chiefly copper pyrittes in a gangue of quartz and spart. Values have increased with depth, and are summer.

Yellow the continue of ore have reduced as high as 800 claim to 400 claim to 400 claims and the continue of the continue of

ore, the new townsite, on Lemon Creek, at the function of the second north fork, at the function of the company of the B.C. Gold Felds of Toronto, owns the townsite and adjacent claims, to make the folial property. A 10-stamp mill has just been completed, for which the pipe line has been finished to convey the water to the pelton wheel. A finne 2100 feet long, 700 feet on large amount of work done by the company. The mines that are being worked are the Golden Wedge and a 110-foot upraise from the lower level extends down the hill 30 feet to a 100-ton ore bin. At the mill an abox chute and man-hole. An ore chute from the lower level extends down the hill 30 feet to a 100-ton ore bin. At the mill an ecommodate another 2000 tons of ore. This see built. Its approach platform will accommodate another 2000 tons of ore. This ore bin is probably the largest in the country. Owing to the excellent manner in the mill with only three men, instead of the six or seven that it generally takes to handle a 10-stamp mill. There are at present 25 men in the stopes, which will teams going at the rate of 38 tons a day. At present the ore is being stored in the large bin, and when there is enough on hand to warrant the continuous running of the mills with only three men, instead of the mills has stamps will drop. The hill teams going at the rate of 38 tons a day. At present the ore is being stored in the large bin, and when there is enough on hand to warrant the continuous running of the mills have a stampling commences.

Of course, the sum tis known as indicated the manage with the under the present and the direct under the property. The bill will be a single from the hole of the ore in the sample of the certain property in the mill will will only three men, instead of the mills and the property of the exceutives of the mills and the property of the contribute to this very high restrictions. The bill will be assays are taken, and if the mill tests come out in value equal to the tests, it will not be long before the \$64,000 will be again in the treasury. Mr. Farini carles with him now something very rare in the shape of orc. It is a sample of galena carrying free visible gold, pockets of which are encountered frequently. Many geologists would question galena carrying free gold, but, as seeing is believing, doubters should inspect Mr. Farini's sample. Mr. Farini leaves today for Oro, and will return in a couple of weeks to take a party up to the formal starting of the stamp mill.—Nelson Miner, March 9.

A Story About Payne Stock.

Scmething About Evening Star.

Five miles from Slocan City, up Springer Creek, is situated the Evening Star mine, one of the most promising mining propositions in the Slocan, so says The Sliverton (B.C.) Slivertonian. This property is equipped with a complete hoisting plant, steam pumps, machine drills and everything that is necessary for the proper developing of a mine. At present the main working shaft is down 160 feet, and sinking is in progress night and day. A station was cut, and a drift driven on the ledge a distance of 50 feet, at the 100-foot level. The vein averages two feet in width, and varies but little in width from the surface to the bottom of the shaft. Fifteen men are at present employed in the mine, and more will be added as room is made for them. The character of the quartz is dry sulphide ore, carrying high values in both gold and silver, averaging 260 ounces in silver and \$30 in gold per ton. The vein is a true fassure in a granite formation, the strike be-

King. Acting Through the Stomach and Blood it Clears Out All Residues and Gives You a New Body.

A LAWYER'S CLERK TELLS HIS STORY

"Will this dreadful headache never stop."
How often do you hear that sort of thing? The same dull, maddening throb keeps up until the afflicted one is almost hopeless of ever again enjoying a tranquil moment. Rest is out of the question. A sleep of eight hours of so does not refresh. It without aiming at oratorical and wearily the sick one gets up to find the headache waiting to torture him again. Then does life become a howing winderness in very truth. The cause of all this miser; is constipation. You would think it a terrible matter if the sewer that served your house were not cleansed out occasionally.

The conservative meeting discourses of various branches of musical research. Among them are "Folk Song in America," "Classic and Romantic Music," "Shakesperean Songs and Dances," "Chinese Music and Antique Art." These, and many more we may hope to hear later on.

Mr. Krehbell, without aiming at oratorical effects, seeks to awaken interest in music and to prepare his hearers to form the trustest and best conception of composers' meanings when listening to the performance of their works.

Young Conservative Meeting. New Denver (B.C.) Ledge.

It is a fortunate condition of affairs to be lucky. Years ago, in Ainsworth, T. J. Lendrum was very obliging and kind to Scott McDonald. He lent McDonald \$1000 one day, and although McDonald 81000 one day, and although McDonald flood one day, and although the fick is out of the question. A sleep of althous on outselve the sign of the first flood one day be long before the signs of ill-health become apparent. The evidences of disease
are disgusting and revolting. Take Celery
King and get rid of these evidences by getting rid of the disease. A law clerk and
stenographer writes: "I am 22 years old;
occupation is that of law clerk and stenographer. Over a month ago I had pains
in my head and was continually constipated. It was told that I was billons, and that

is the richest quartz bearing property so har discovered in this camp.

The management have ordered a steam holst with boller and engine, that are now

on the way to the mine.

A Word About Joe Murphy.

It may be of some interest to castern Canadian snareholders, especially if they are all superstitious, to know that Joe Murphy, a typical trishman, located the Waterloo on the 17th day of March, St. I atrick's day, and it is reported that Joe once kissed the Blarney stone. Be this as it may, the Waterloo is in the hands of a thoroughly capable and experienced mining main, who has the interests of the shareholders, at heart in making the mine a famous one and a dividend-payer.

THE WORLD AT GAMP McKINNEY.

Our Correspondent Pays a Flying Visit to the Waterloo Mine—

Its Valuable Ore.

Camp McKinney, B.C., March 9.—(Special Correspondence.)—This oid camp is experiencing a genuine boom. Daily the stages bring crowds of prospectors, miners and mining operators, that now one finus the question of a night's lodging an extremely difficult one. There are only two hotels in an mining operators, that now one finus the dining rooms and kitchens being turned to good use for sleeping accommodation at 31 per "shakedown" per night. Within the past month representatives of Spokane, the place of undeveloped claims, but 18 sould have been pouring into camp.

As usual, Spokane gets in ahead and secures the pick of undeveloped claims, but 18 said here that the mili run for the last the mill run for the last mount about the first mount of \$25,509.00.0"

Messrs. Curry & Kiteley in their daily review on mining shares say: "The principal feature of the market to-day was the movement in Golden Star. It was expected that this stock would advance, owing to the favorable report of the last clean-up, but it sold stendily around 71 in the morning, and in the afternoon closed weaker start 70, and with 69½ bid and 73 askied. This was quite contrary to expectations. The McKinney, 500 at 10% at 10 at

Dundee Concentrator. the concentrates run as high as \$76.80 per ton.—Rossland Miner, March 9, '90.

NO WONDER HE BECAME INSANE. Peter Lark, the Policeman at Greenwood Cemetery, Took His

Foreign Missions as a celebration of the closing century.

A committee composed of John Stark, Rev. S. S. Bates, Rev. J. P. McEwan and Itev. A. P. McDiarmid were appointed to appoint a committee of 16 others who will be recommended to the Ontario and Quebec Baptist convention, which meets at Walmer-road Church in May, as suitable men to take charge of the undertaking.

March 23, on "How to Listen to Music," is one of the greatest living authorities on Wagner and his life work. His manner, although pleasantly tinged with humor, is dignified, and all that he has to say is well worth being listened to. The plan opens at Mason & Risch's warerooms on March 13, and all who wish to be present should secure seats at an early date. "How to Listen to Music" is a discourse on the nature and contents of music, its elements, the devices of composers, rational and irrational criticism.

Mr. Krehbeil has many other equally interesting discourses on various branches of musical research. Among them are "Folk Song in America," "Classic and Romantic Music," "Shakesperean Songs and Dances," "Chinese Music and Antique Art." These, and many more we may hope to hear later

strongly on the questions of the day, and at its next meeting, which is to take place on Friday, the 17th, it proposes to discuss the live question of the constitution of the Senate. The association has until the present held its meetings on Saturday, but after full consideration, decided upon Friday as a better night for commercial men who are so vitally interested in the great questions of Tae day. Numbers of them had complained that Saturday evening was unsuitable for them, and the association considered it in the interests of all to substitute Friday for its regular meeting.

Industrial Schools for the Colored. Mr A. B. Walker, barrister, of Se' John, N.B., is in town, soliciting aid for the establishment of industrial schools for the colored people of the West Indies. He is sent out on the mission by Bishop Derrick, the head of the African Methodist Epis copal Church.

Summit-Republic and Dora Gold Mining Co's.

THE DORA shaft has cut three feet of quartz averaging \$154 per ton, picked specimens assaying from \$640 to \$1037 per ton in gold. Note that Noble Three and Jumbo veins also pass through this property.

THE SUMMIT tunnel has crosscut is feet of quartz at present writing without passing through the vein, the full width of which is therefore not yet determined. The depth is only 20 feet and the values consequently are low, averaging \$5.00 per ton in gold. This is known as the NUMBER SIX VEIN and was encountered just as was predicted from the map above, thus proving the accuracy of the surveys. The main crosscut tunnel is now being crowded ahead to cut the REPUBLIC VEIN, as shown in the map. The management of both these properties is of the highest character, including prominent mine operators, mining engineers, bankers and business men as can be ascertained by investigation, which is solicited. Work is being vigorously pushed to develop these properties rapidly, and the personnel of the management insures results for the best interests of the stockholders. We have a limited amount of stock in each company, as follows: Summit-Republic at 6 cents and Dora at 5 cents per share, and strongly recommend these AS AN INVESTMENT. For shares and further particulars apply to-

TALENT -

Yes, there's considerable talent shown in that exceedingly clever drawing on exhibition in my window, which is attracting so much attention just now. Mr. H. Dixon of 124 Victoria-street, city, is responsible for the excellent workmanship. What is the picture? Well, it gives a bird's eye view of YMIR, B.C., and shows the location of the well-known DUNDEE, FAIRMONT, TAMARACK, MONARCH and many other properties in that section. Take a glance at it when passing.

THE WIARTON

The WIARTON is located between the properties of the famous Cariboo Company and the Waterloo, which is fast developing into a phenomenal property. The Caribod ledge passes through the entire length of the WIARTON and into the Waterloo ground. The property consists of about 48 acres, is CROWN GRANTED, and is owned by the CAMP MCKINNEY DEVELOPMENT COMPANY, a British Columbia corporation, with a capital of 600,000 shares of \$1 each. The treasury stock consists of 200,000 shares, which will be treated as a reserve. The owners of the property take 200,000 shares as part payment for the property; the other 200,000 shares will be sold from time to time, and out of the proceeds \$10,000 in cash will be placed in the treasury of the company and spent upon the property before any of the treasury stock will be offered for sale.
