After five years of experimentation, slight changes were made in the formula. Since 1903 this New Nestle's provements made on theoretical grounds have in the course of the past three years been proven by thousands of clinical tests to be a step in advance

THE CHANGES

Since July 1, 1906, the Nestle's Food made and sold in this country has been prepared according to the new formula.

Chief among the modifications made is the conversion of a larger percentage Miss Leota Rowe, soprano, and Mr. maltose. Nestle's Food has not, howchange, as the percentage of maltose is inconsiderable. Other changes are the increase of fat

percentages, and the reduction of the amount of cane sugar. No change has been made in the appearance of the package, the label and outside wrapper being the same as have been used for the past thirty-five years.

The basis of Nestle's Food is pure Sunny Hours Englemann cow's milk, condensed in vacuo, and so treated that the proteids are easily di-

> One of the principal reasons for the ... Jungmann great success Nestle's Food has attained, in all parts of the world, is that for use.

It is well known that a large percentage of infants cannot digest fresh cow's milk, no matter how carefully it is modified. In such cases Nestle's Food is especially valuable, since its mode of manufacture and preparation renders its constituents readily assimilable by even the youngest infants.

A full description of Nestle's Food and statement of the considerations that led to the changes in the formula, have been set forth in a pamplet entitled "Recent Work in Infant Feeding." This we will gladly mail (with samples of Nestle's Food if desired) on request
