Hart-Bell Carbon Remover, \$10.00

Is a money-saver for the motorist. The Hart-Bell Carbon Remover is a simple device, easily installed and absolutely safe. It takes a little water from the cooling system to the intake manifold, and this water is sucked into the cylinders with the fuel, converted into live steam by the heat of the explosion, and loosens the carbon deposit while the motor is running. The carbon is then easily blown out through the exhaust.

The device is also constructed so as to allow a supply of auxiliary air to enter the combustion chamber. The supply can be turned on and off at will. This is a very valuable feature, as it insures more complete combustion, therefore less carbon formation and increased mileage. Price, installed, \$10.00.

ELWELL SLAIN BY JEALOUS HUSBAND?

New York Society Woman Said to Be Implicated in Scandal.

BIG WHIST PLUNGER

One Theory is That Victim of "Wizard's" Skill at Cards Did Shooting.

New York, June 14.—Jealousy over a woman or vengeance for heavy losses sustained at cards—whichever theory is correct, it is the motive for the murder here last Friday of Joseph B. Elwell, wealthy turfman and "whist wizard."

The police tonight were fluctuating between these theories in their efforts to solve a crime which they admitted was the most baffling they had encountered in years.

On the other hand, the police were reluctant to discard the theory that a gambler, "broke," at whist by Elwell, may have done the shooting.

They sought to trace the source of a report that such a gambler had threatened to kill Elwell, and in continuing today examination of society women, sporting men and prominent figures in New York's financial district, where Elwell occupied a brok-

er's office, devoted most of their questions to "big play," in which he had engaged.

"Sky the Limit." Some witnesses described to the police games in which the sky literally was the limit; games in which Elwell had matched wits—and considerable resources of his own—against the still greater resources of financiers with an international reputation.

On the other hand, stories of Elwell's "killings"—once estimated by his wife, from whom he was separated, as high as \$30,000 one evening—were contradicted by Wilbur C. Whitehead, associated with the banking firm of E. N. Breitman and Company.

Meanwhile preparations were being made for the funeral tomorrow at Ridgewood, N.J. Richard Elwell, 15-year-old son of the murdered man, arrived here today for the service from Andover Academy, where he is a student.

Jos. S. Elwell, father of the card expert, today obtained permission from the surrogate's court to open a safe deposit vault which, he said, contained his son's will.

The safe deposit vault was opened late today and the reports to be Elwell's last will was found. This document was said to leave all his real estate and personal property to his mother and father.

HARDING FRIENDLY TOWARD BRITAIN

Examination of Record Shows That He Frowned Upon "Tail-Twisting."

New York, June 14.—Canadians resident here are today deriving into the political record of Senator Warren G. Harding, the Republican nominee for the presidency of the United States, in an effort to ascertain his attitude in matters affecting Canada and the British Empire. The consensus of opinion appears to be that he has shown himself to be well disposed towards Great Britain and the British Dominions, and that if elected, he will be likely to interest himself in the maintenance of relations of cordial friendship between Canada and the United States.

While strongly opposed to the ratification of the peace treaty and the league of nations, Senator Harding's war record shows that he gave support to the administration and favored close co-operation with the allies. He voted for the arming of American merchant ships against the German submarines and for the declaration of war on Germany.

Once the United States was in the war he supported war legislation generally with a few minor exceptions.

No "Tail Twister." During the session of March 18, 1920, which lasted nearly until midnight, Senator Harding voted against propositions which sought to have the senate declare its sympathy with Irish aspirations for a government of their own, and declaring if their self-government was obtained they should be admitted to the league of nations.

On the same day Senator Lodge, during the treaty fight, moved to strike out of one of the pending amendments the words "the principle of self-determination" so as to make the proposed Gerry amendment provide that "in consenting to the ratification of the treaty with Germany, the United States adheres to the resolution of sympathy with the aspirations of the Irish people." This was rejected, but Harding voted with Lodge for its adoption.

FLAYS BACKERS OF 'OUTLAW STRIKERS'

Resolution of Censure is Introduced at A. F. of L. Convention.

Montreal, June 14.—Central labor bodies, who aided "outlaw strikers" during the recent railroad strike in the United States are condemned in a resolution presented at the annual convention of the American Federation of Labor here today by T. C. Cashem, of Cleveland, in behalf of the International Switchmen's Union.

Mr. Cashem charged that a number of central bodies throughout the country had aided "switchmen belonging to an outlaw organization" during the strike by raising strike funds and furnishing them with meeting halls.

He referred especially to the San Francisco central body, which he said he "understood had raised a big strike fund for the outlaw strikers."

The striking railroadmen, it was pointed out, were not affiliated with the federation and as members of a "rival organization" should not have received labor's support. As the constitution of the federation does not provide any punishment for such action, Mr. Cashem urged that they be condemned and warned not to aid any similar strike in the future.

WHY POLISH CABINET QUIT

Washington, June 14.—A cablegram from Warsaw to the Polish legation today explained that the recent resignation of the Polish cabinet was caused by a difference of opinion among the members as to the "sequestration of grain."
