More Disclosures Made at Crown Timber Investigation.

UNUSUAL STATE OF AFFAIRS

More irregularities, and unbusinessthe methods were brought to light sesterday at the judicial commission which is inquiring into the affairs of was shown that cullers' returns of logs cut, as shown by the Spanish River Company's books, have not been filed

received in dues.
When the Spanish River Lumber Company was cutting off new limits in 1917-19, generally speaking, they got more timber out of each log than was actually reported to the government?"
Justice Riddell asked Thos. E. Lawless, an accountant, who has been examining this company's books for the crown in connection with the probe. Mr. Lawless replied affirmatively, explaining figures which he had compried, showing that the average size of cut was 58.5 feet, as shown by mill cut, whereas an average of 35.5 feet only was reported to the government, an over-run of 64.7 per cent.

Big Increases. It was brought out by Mr. McEvoy that from 1910 to 1918 the proportion of Nos. 1, 2 and 3 culls to the total merchantable timber cut increased very materially. In the former year, 27,735,875 feet of merchantable timber was cut, the three classifications of culls totafing 7,747,825 feet. In the latter year the total cut was 13,248,145 otaled 11.980,308 feet.

Mr. McEvoy, from figures put in, argued that the company on limits cut by its own men got a very much larger percentage of logs 6 inches in diameter than the jobbers got on lots oper-

82 Hickory St., Ottawa, Ont. "I was for many years a victim of 1913, I was laid up for four months with Rheumatism in the joints of the knees, hips and shoulders and was prevented from following my work, that of Electrician.

I tried many remedies and was under the care of a physician; but nothing did me any good. Then I began to take 'Fruit-a-tives' and in a week I was easier, and in six weeks I was so well I went to work again.

I look upon this fruit medicine, 'Fruit-a-tives', as simply marvellous in the cure of Rheumatism, and strongly advise everyone suffering with Rheumatism to give 'Fruit-a-tives' a trial." AMEDEE GARCEAU.

## PROFESSOR NEISH STRONG CANADIAN

Advocates Patronage Home Industries, Especially Industrial Chemistry

"Champion Canadian home industry." This was the ringing message sent out to the people of the Dominion by Professor Neish, Queen's University, at last night's delightful banquet held at Hart House, under the auspices of the Ontario Society of Industrial Chemistry. "Why should a Canadian have to pay 59 per cent more for an article than he would pay in the United tSates? And yet this is just representing the facts of the iust representing the facts of the case," said the speaker. Before the war Canada bought too much from over the water; today she buys too much from across the line. I know of one case in which a woman sold American toothpaste at twice its cost to her, after paying the duty! Professor Neish further expressed the hope that the term chemist would be legislated off the windows of drug stores, and that they would be permitted only to class themselves as

druggists or pharmacists.
Other speakers were Kenrick and Ardagh, Dr. Shutt Wardleworth and Dr. McLaurin. Wardieworth and Dr. McLaurin. Felicitations between Professor Van der Linde, newly elected president of the Canadian Society, and Professor Goodwin, Queen's University, former president, coupled with complimentary references to Hart House, its founder, Vincent Massey, and Toronto hosts generally, concluded a right royal evening at the festive
