

BYE-LAWS OF THE CORPORATION OF THE CITY OF SAINT JOHN.

A Law to establish a Fire Department, and to provide for the better extinguishing of Fires in the City of Saint John.

Passed 14th February, 1851.
Enacted 28th February, 1851.

BE it Ordained by the Mayor, Aldermen and Commonality of the City of Saint John, in Common Councils Ordoned, That a Fire Department shall be, and hereby is established in the City of Saint John, and that the same shall consist of one Chief Engineer, and so many other Engineers, Firemen, Fire Policemen and Firewards, as shall be appointed by the Common Council in manner hereinafter mentioned.

II. And be it Ordained, That the said Fire Department shall be organized and divided into Engine Companies, a Company of Hook and Ladders, a Company of Fire Policemen, and a Company of Firewards.

III. And be it Ordained, That the several Fire Engines now belonging, or which may hereafter belong, to the said City, or which may, from time to time, be authorized by the Common Council to be used or employed in the public service of the said City, shall be respectively and consecutively numbered, commencing with number One, as the Common Council shall from time to time direct.

IV. And be it Ordained, That one Engine Company shall be attached to each Engine, and shall be designated by the number of such Engine.

V. And be it Ordained, That each Engine Company shall consist of one Engineer, and of so many Firemen as the Common Council shall from time to time nominate and direct.

VI. And be it Ordained, That each of the said Engine Companies shall elect and choose, from time to time, out of the Firemen belonging to the said Company, a Foreman, an Assistant Foreman and a Clerk, and the same may remove and displace from office at pleasure, which Foreman, Assistant Foreman and Clerk, shall serve until others are elected and chosen, unless sooner displaced by the Common Council, and the Companies shall and may make such Rules and Regulations for such Election, and also for other purposes relating to the internal government of their respective Companies as they may think fit, subject nevertheless to the disallowance of the same or any part thereof, at any time whatsoever by the Common Council, and one copy of such Rules and Regulations shall be deposited in the Office of the Common Clerk, and another copy thereof with the Chief Engineer.

VII. And be it Ordained, That the Company of Hook and Ladders shall consist of such and so many Firemen, not belonging to any Engine Company, as the Common Council shall from time to time direct, one of whom shall be elected by the Company to be Captain of the said Company of Hook and Ladders.

VIII. And be it Ordained, That the Company of Fire Policemen shall consist of such and so many persons, not exceeding Fifty, being Freemen and Inhabitants of the said City, as the Common Council shall, from time to time, direct, one of whom shall be appointed by the Common Council to be Captain of the said Company of Fire Policemen, and another of them to be Lieutenant of the said Company.

IX. And be it Ordained, That the Company of Firewards shall consist of such and so many persons, being Freemen and Inhabitants of the said City, as the Common Council shall, from time to time, direct, and that the Mayor, for the time being, shall be ex-officio a Fireward, and the Chief of the said Company of Firewards.

X. And be it Ordained, That all the Members of the Fire Department shall hold their respective appointments during the pleasure of the Common Council, and that all the Members of each Engine Company, and of the Company of Hook and Ladders, shall be numbered in a roll of each Company, and that every Member of the Fire Department shall receive a Warrant of appointment under the Common Seal of the said City, signed by the Mayor for the time being, and countersigned by the Common Clerk for the time being, and that no fees of office shall be paid for any such Warrant, except by the Chief Engineer, who shall receive such a compensation for his services as the Common Council may from time to time direct.

XI. And be it Ordained, That it shall not be necessary for any person appointed to be a Member of the Fire Department to take any oath of office, excepting the Fire Policemen, each of whom shall be sworn to the faithful discharge of his duty, in like manner as other persons appointed to office by the Common Council are directed to be sworn.

XII. And be it Ordained, That the Chief Engineer, subject to the direction of the Common Council, shall have the superintendence and charge of all the affairs of the Fire Department, and the command and government over all the Engineers and Firemen attached thereto; and it shall be his duty to examine into the condition of the Fire Engines and other houses and places used for the purposes of the Fire Department, and also of the several Engine Companies, and of the Company of Hook and Ladders, at least once in every three months, or whenever directed so to do, by any order of the Common Council, or by the Mayor, or by any Committee of the Common Council on the affairs of the Fire Department; and also, on the first days of April, July, October, and January, in each and every year, to report the state and condition thereof to the Common Council; and oftener if thereto requested, and shall accompany such Report with the names of the Officers and Members of the said Fire Department; and whenever the Engines or other Fire Apparatus, Engine Houses, or other houses used by the Fire Department, may require alterations, additions, or repairs, the Chief Engineer, under the direction and order of the Common Council, shall cause the same to be made; and it shall be further the duty of the Chief Engineer, at all times, to keep fair and exact rolls of the names of the Members of the respective Engine Companies, and Company of Hook and Ladders, specifying the time of admission and discharge, and the age of each Member, and also to cause to be registered and entered with the Clerk of the Peace of the City and County of Saint John, the names of such persons as from time to time shall be appointed Members of the Fire Department, and to report in writing to the Common Council, as soon as may be after the same shall occur, all accidents by fire which may happen within the City, with the causes thereof, as well as can be ascertained, and the number and description of the buildings destroyed or injured, and the purposes for which they were used, together with the names of the owners or occupants.

XIII. And be it Ordained, That the Company of Hook and Ladders shall be supplied with such Firehooks, Ladders, and other implements, at the public expense, as the Common Council shall from time to time direct, and it shall be the duty of the Members, and each and every of

them belonging to the said respective Companies, to take care of and keep in good order, and attend at fires with all such Hooks, Ladders, and other implements as they may be respectively supplied with, and shall use and employ the same at any fire, as may be directed by the Chief Engineer, or any other Engineer.

XIV. And be it Ordained, That it shall be the duty of the respective Engineers of the respective Engine Companies, and the Captain of the Company of Hook and Ladders, to see that the several Engines and other apparatus committed to the care of each respective Company, and the several buildings in which the same are deposited, and all things in or belonging to the same, are kept clean, neat, and in order for immediate use; and it shall also be their respective duties to preserve order and discipline at all times in their respective Companies, and require and enforce a strict compliance with the City ordinances, and all regulations of the department, and the orders of the Chief Engineer; and they shall also keep, or cause to be kept, by the Clerks of the respective Companies, fair and exact rolls, specifying the time of admission and discharge, and the age of each member, and accounts of all property, apparatus and implements entrusted to the care of the respective Companies, or of the several members thereof, and fair records of the proceedings of the Company, in a book furnished for that purpose by the Chief Engineer, at the expense of the City, which rolls or record books, and the custody and inspection thereof, are always to be subject to the order of the Common Council, or the Mayor, or the Chief Engineer.

XV. And be it Ordained, That once in every month, and oftener if necessary, or if thereunto required by the Chief Engineer, the said Engine Companies shall meet for the purpose of examining the state of their respective Engines and other apparatus, and seeing that the same are in good order and fit for service; and once in each of the months of April, May, June, July, August, September and October, and at other times, whenever required by the Chief Engineer, shall draw out their respective Engines and other apparatus to wash and cleanse the same, and to exercise the Members of the Companies, and the same carefully to return; and it shall be the special duty of the Firemen belonging to each Engine Company, under the direction of the Engineer of the said Company, (in the performance of which duty each Fireman is to take his regular turn of duty according to the roll of the Company,) to take the respective Engines apart, and to clean, oil, and put the same again together and in good order; and that examinations of the several Engine Companies and Company of Hook and Ladders shall take place at such other time or times as the Chief Engineer shall from time to time order and direct, and that the Members of the said several Companies do attend all meetings for the purpose of any examination, at their respective Engine Houses, or at such other places as the Chief Engineer of each respective Company shall, with the consent of the Chief Engineer, name and appoint; and the roll of each respective Company shall be called over at the hour and place appointed for their assembly, and any Member who shall not be present and answer to his name when such roll is called over, shall be liable to the penalty of Five Shillings for each default.

XVI. And be it Ordained, That the members of each Company shall take monthly turns, that is to say, of the several Engine Companies, four Firemen, and of the Company of Hook and Ladders, two at a time, in the order that they may stand in their respective rolls, whose duty it shall be to clear away the snow from the front of the Engine or other houses belonging to or used by each respective Company in the winter months, and attend to keeping the apparatus in good order, and performing such other services as may from time to time be required of them.

XVII. And be it Ordained, That the Officers and other Members of the Fire Department shall wear or carry such caps, badges, or insignia of office as the respective Companies shall from time to time adopt, subject to the approval of the Common Council, and shall appear therewith at every regular or stated meeting of their respective Companies, under the penalty of Five Shillings for each default.

XVIII. And be it Ordained, That it shall be the duty of the said Chief Engineer, whenever a fire shall break out in the City, to repair forthwith to or near the place where the same may be, and to take proper measures that the several Engines and other fire apparatus arranged in the most advantageous situations and duly worked, and to require and compel assistance from all persons present, as well members of the fire department as others, in extinguishing and preventing the fire; and the Chief Engineer shall have the chief and absolute control and command over all the Engineers and Firemen, and shall have the chief direction of all proper measures for the extinguishment and prevention of the fire, and for the preservation of order and the observance of the provisions of the Fire Laws and regulations.

XIX. And be it Ordained, That whenever it shall be determined at any fire by the Chief Engineer and any other Engineer present, with any two Firewards, to be necessary to pull down or otherwise demolish any building, if the Chief Engineer shall so direct; provided that, if by the joint order of any one Engineer and two Firewards, and all persons present, if required by the said Chief Engineer, or any other Engineer, or Fireward, shall be aiding and assisting thereat.

XX. And be it Ordained, That in case of the absence of the Chief Engineer at any fire, one of the Engineers in command of an Engine Company shall act in his place, and shall execute his office with full powers, according to the following order, viz:—
The Engineer of Engine Company No. 1, during the Months of January and February.
The Engineer of Engine Company No. 2, during the Months of March and April.
The Engineer of Engine Company No. 3, during the Months of May and June.
The Engineer of Engine Company No. 4, during the Months of July and August.
The Engineer of Engine Company No. 5, during the Months of September and October.
The Engineer of Engine Company No. 6, during the Months of November and December.

And if in the absence of the proper Engineer, the Engineer in command of the Engine Company next in order of number shall act in his place, and so on in succession.

XXI. And be it Ordained, That it shall be the duty of the Officers and Members of the several Engine Companies, and Company of Hook and Ladders, whenever a fire shall break out in the said City, forthwith to repair to their respective Engine Houses and other places for keeping the Engines, Hose, Hooks, Ladders, and other Apparatus, and to convey and arrange them in an orderly manner, to or near the place where the fire may be, and in conformity with the directions of the Chief Engineer, to exert themselves in working, managing, and using the Engines, Hose, Hooks, Ladders, and other Apparatus, and in performing any duty that they may be called upon to do; and all Members of Engine Companies, who are not employed in working their Engines, shall arrange themselves in order near to where their respective Engines may be placed, so as to be in readiness to relieve those who may require it, in working the said Engines; and it shall be the special duty of the Firemen, to pump and work their respective Engines, and exert themselves to supply water for the Engine, and Engineer or Foreman of his Company; and any Fireman of an Engine Company who shall quit his post without the

consent of one of the Officers belonging to such Company, shall be liable to the penalty of Ten Shillings for each offence; and upon permission of the Chief Engineer, the Officers and Members of the several Engine Companies, and Company of Hook and Ladders, shall, in an orderly and quiet manner, return their respective Engines, Hose, Hooks, Ladders, and other Apparatus, to their proper respective places of deposit, and shall then and there forthwith cause the same to be well washed, cleansed, oiled, and securely housed.

(Conclusion next week.)

MUSIC.
Let all learn to sing, and, if possible, to play on instruments. If time is scarce, take time, and rely upon it, you will regain that time, both in increased mental and physical energy through life, so as to make up this time, and especially in prolonging life itself. Let children and youth more especially be encouraged to sing. The growing custom of relieving the tedium of the school-room by interspersing music, is admirable. Let it be practised often through the day, throughout all the week in christendom. It will greatly promote study, as well as cultivate the delightful and moralizing faculty, instead of repulsive. It will keep alive this strong native passion, now allowed to slumber, and finally die by disuse. As all children have a faculty by nature, all can or could have become good singers and players if it had been early and duly cultivated. Let mothers sing much to their children, as well as strike up cheerful lays when about the house and garden, so as to inspire this divine sentiment in all about them, as well as thereby give unrestrained freedom to these lively, buoyant, elevated, happy feelings, so abundant by nature in the soul. Song in woman is inexpressibly beautiful. She is pre-eminently adapted to pour forth her soul in strains of melting pathos.—She is a better natural musician than man; and hence can diffuse in society those pure feelings and holy aspirations inspired by music—especially female singing. She can therefore charm her wayward children, and soothe the angry by the enchanting and soothing.—When her children become fretful or ill-tempered, she can sing them out of temper into sweetness more easily and effectually than any other means. One sweet tune, when they are crying, will quell wrath and promote love a hundredfold more than whips. The former is irresistible, and tames down their rougher passions at once; the latter only re-ignites. Sweet music will hush still any crying child, and dispel anger as easily as the sun fog. If mothers would soothe their children out of badness into goodness—would sing to make and keep them good, and because they were good—how sweetly heaven disposed they might render their children!

Music should therefore be almost an indispensable qualification and pre-requisite for marriage, and then be cultivated after marriage—even more than before, where domestic cares too often drown its happy notes. Home is the very orchestra of music. All women should be good singers and players, and men should be good players and singers. The domesticity of husbands, by frequently charming them with singing much. Angels live in song, and she approximates nearer to them than other earthly creature. Let woman cultivate this gift which is in her. Let children be encouraged to tune their young voices when about the house and fields, both singly and in concert, as well as persuaded to assist in contenting. Let boys be encouraged to whistle, and play on instruments, and laborers make field and forest ring and echo with their lively, thrilling notes.—*Amer. Phrenological Journal.*

GROCERIES! GROCERIES!!
Stock on Hand, March 1st, 1851.
50 CHESTNUTS Souchong and fine CONGO TEA;
10 doz. Gunpowder and Hyson Tees;

WOOLLEN HALL,
JUST OPENED BY
JAMES GARRETT & CO.
In Wiggin's new Brick Building, corner of Prince William and Princess Streets, opposite the Book Store of Messrs. H. Clough & Co.; and on the corner North of the Commercial Bank Building.
Which the Citizens of SAINT JOHN and the Public generally, are respectfully invited to visit and walk through, in respect to purchases.

For many years past it has been increasing our conviction—First, that private enterprise is one of the most powerful means of forwarding the prosperity of a country;—Secondly, that the public are benefited by being supplied with good and cheap articles for cash, instead of inferior and dear ones on credit.

In the carrying out of the first of these objects, we have repeatedly—in order to the extension of our business—laid out considerable portions of our acquired capital in providing increased accommodation, always with entire success; our last effort in this way being the leasing of that magnificent Shop, recently fitted up and decorated expressly for us, by our enterprising townsman, Mr. F. A. Wiggin, and we no more lacking a commensurate increase of our business than we doubt the discriminating powers of the New-Brunswick.

In the carrying out of our second proposition we commenced the Tailoring Trade, and introduced the system of supplying good and cheap Clothing at moderate prices on Cash, the proof of our success will be found in the numerous names we have added to our confidence in the principles we have acted on, as evidenced in the large shop we have just taken.

In launching forth our new enterprise on the public sea we do so with the conviction that our success must mainly depend upon ourselves; that there are thousands who want clothes daily in an unamissable fact that many will come to us if they feel we offer inducements equally true; we avow ourselves in every sense of the word, Progressionists—always aiming at improvement, every year adds to our capability of doing business well; we know more this year than last, one conviction has strong and only aspirations inspired by success—especially female singing. She can therefore charm her wayward children, and soothe the angry by the enchanting and soothing.—When her children become fretful or ill-tempered, she can sing them out of temper into sweetness more easily and effectually than any other means. One sweet tune, when they are crying, will quell wrath and promote love a hundredfold more than whips. The former is irresistible, and tames down their rougher passions at once; the latter only re-ignites. Sweet music will hush still any crying child, and dispel anger as easily as the sun fog. If mothers would soothe their children out of badness into goodness—would sing to make and keep them good, and because they were good—how sweetly heaven disposed they might render their children!

With these views we have devoted much attention latterly to improvements which are making in the manufacture of Woollens; and we think, may be we are satisfied we have succeeded in adopting the most important of them, we may here state that in our frequent use below of the words "Low Quality" it is in articles which we can warrant as really good value.

With this preamble, we beg briefly to direct attention to the several departments, promising that in every instance where we can procure the best Fabrics, well made and good value; we give them a decided preference.
Department No. 1. BLACK CLOTHS.
Department No. 2. MEXLEY CLOTHS.
Department No. 3. VESTINGS.

Astonishing Efficacy of HOLLOWAY'S PILLS And OINTMENT.

EXTRAORDINARY CURES BY Holloway's Ointment.

CURE OF A DESPERATE CASE OF ERYSIPELIS. Copy of a Letter from Mr. Joseph Gildon, Farmer, East Kent, near Spalding, Lincolnshire, 8th April, 1846.

TO PROFESSOR HOLLOWAY.
SIR,—I have the gratification to announce to you a most wonderful cure wrought upon myself, by the use of your Ointment and Pills. I had a severe attack of Erysipelas in my right foot, which extended along my ankle, and was attended with swelling and inflammation to a alarming degree, inasmuch that I was unable to move without the use of crutches. I consulted a very eminent Physician, besides other Medical men, but to no purpose. At last I tried your Ointment and Pills, when, strange to say, in less than two weeks the swelling and inflammation subsided to such a degree that I was enabled to pursue my daily avocations, to the utter surprise and amazement of those who were acquainted with my case, seeing that I was cured so quickly. I and my family are well known here, as my father holds his farm under the Rev. J. Spence, Recteur of our Parish.

JOSEPH GILDON.
Annihilation of Two Legs Prevented.
Extract of a Letter dated Roscommon, Eyre, 23rd, 1847, from the highly respectable proprietor of the Roscommon Journal.
TO PROFESSOR HOLLOWAY.
SIR—Mr. Ryan, the well known proprietor of the Hotel near to me, had a very bad Leg one with eight ulcers on it, the other with three. They were in such a fearful state that the effluvia from them was very great. Some time since he made a journey to Dublin for the purpose of consulting some of the most eminent professional men, but returned home to his family with the choice of two alternatives—to have both Legs amputated, or to have the one saved. He met a gentleman in the Coach who recommended the use of Holloway's Pills and Ointment, which he had recourse to, and was perfectly cured by their means.
(Signed) CHARLES TULLY,
Editor and Proprietor of the Roscommon Journal.

Bad Digestion, with extreme Weakness and Debility—an extraordinary Cure.
TO PROFESSOR HOLLOWAY.
SIR—Mr. T. GARDNER, of No. 9, Broad Street, Grosvenor square, had been in a very bad state of health for a long time, suffering much from a distended Stomach, very impaired digestion, with constant pain in his Chest, was extremely nervous, and so greatly debilitated as to be scarcely able to walk one hundred yards; during the long period of his illness he had the advice of four of the most eminent Physicians besides five Surgeons of the greatest celebrity in London, from whom he derived no benefit whatever. At last he had recourse to Holloway's Pills, which he declared effected a perfect cure in a very short time, and that he is now as strong and vigorous as ever he was in his life. This being so extraordinary a case, may lead many persons almost to doubt the efficacy of it, may therefore be necessary to say that Mr. Gardner is a broker, and well known.

Cure of a Desperate Scrotoic Eruption of one standing.
Extract of a Letter, dated Holywell, 10th of February, 1847, confirmed by Mr. Simpson, Stationer, St. John, N. B.
TO PROFESSOR HOLLOWAY.
SIR—Having been wonderfully restored from a state of great suffering, illness and debility, by the use of your Pills and Ointment, I think it my duty for the sake of others to make my case known to you. For the last two years I was afflicted with a violent Scrotoic Eruption, which completely covered my Chest, and other parts of my body, causing me a violent pain, that I can in truth say, that for months together, I was not able to sleep more than a very short time together. I applied here to all the principal Medical men, as also to those in Birmingham, without getting the least relief; at last I was commended by Mr. Thomas Simpson, Stationer, Market-place, to try your Pills and Ointment, which I did, and I am happy to say, that I can now sleep all the night through, and the pain in my back and limbs have entirely left me.
(Signed) RICHARD HAVELL.
In all Diseases of the Skin, Bad Legs, Old Wounds and Ulcers, Bad Breasts, Sore Nipples, Stony and Ulcerated Cancri, Stiff Joints, Swellings Gout, Rheumatism, and Lumbago, Swelling of the Face, and all the Scrotoic eruptions, and in cases of Piles: Holloway's Pills, in all the above cases, ought to be used with the Ointment and not alone. The Ointment is proved to be a certain remedy for the bite of Mosquitoes, Sand flies, Chigoeft, Yaws, Coco-bay, and all Skin Diseases common to Europe, the East and West Indies, and other tropical climates. Burns, Scalds, Chilblains, Clapped Hands and Lips, also Bunions and Soft Corns, will be immediately cured by the use of the Ointment. Sold by the Proprietor, 244, Strand, near Temple Bar, London; and by PETERS & TILLEY, Provincial Agents, No. 2, King Street, St. John, N. B.; James E. Gale, Frederick St.; W. T. Baird, Woodstock; Alexander Lockhart, Quebec; James Beck, Bend of Petittocodac; O. X. Sayre, Rochester; John Bell, Sheldiac; J. O. Lewis, Hillsborough; John Curry, Canning; and James G. White, Bellefleur, in Pots and Boxes, at 1s. 6d. and 7s. each. There is a very considerable saving in taking the larger sizes.
N. B.—Directions for the guidance of patients are affixed to each pot.

Sands' Sarsaparilla.

FOR PURIFYING THE BLOOD, &c.
THE PROPRIETORS have spent much time in preparing this preparation of Sarsaparilla to its present state of perfection; and the experience of fourteen years has furnished them with ample opportunity to study, in their various travels, the diseases for which it is recommended, and to adapt it exactly to their relief and cure. Patients who wish a really good Medicine are invited to give it a trial, and satisfy themselves of its superiority, and the invaluable property it possesses of purifying and curing disease. The bottle has been enlarged to hold ONE QUART, and in its present improved form may safely claim to be the best and cheapest Medicine of the age. Its progress to the fame it has attained may be traced by a long list of facts and cures, that stand as landmarks beacons for the invalid, pointing the way to the haven of health, and what it has already done for the thousands who have used it, it is capable of doing for the millions still suffering and struggling with disease. It purifies, cleanses, and strengthens the fountain springs of life, and infuses new vigor throughout the whole animal frame.
The diseases for which this medicine is recommended are those to which it is known from personal experience to be adapted; and those apparently removed beyond the sphere of its action have yielded to its influence. The catalogue of complaints might be greatly extended to which the Sarsaparilla is adapted, but experience proves its value, and each succeeding day is adding new trophies to its fame.
BANKERS, VI. Oct. 22, 1818.
Messes. SANDS: I have been afflicted with a severe pain in my side, occasioned by a diseased liver, for the last twenty years, suffering at times with Jaundice, but once taking your Sarsaparilla I have been greatly relieved, so much so that I have been able to attend my business, and pursue occasionally, for the last eighteen months, a wholly dissipated and other medicine, and the only remedy that has benefited me, which I do not recommend to any one who is in any way afflicted with any species of scrotoic complaints. There have been some considerable cures effected by its use in this vicinity. Mrs. I. Shaw, by the use of six bottles, was restored to better health than she had enjoyed for many years; and Mr. Stevens, who had been severely afflicted with erysipelas, was entirely cured by the use of a few bottles.
Wm. GARDNER.
Prepared and sold, wholesale and retail, by A. B. & D. SANDS, Druggists and Chemists, 100 Fulton St., corner of William, New York. Sold also by Druggists generally throughout the United States and Canada. Price \$1 per Bottle; six Bottles for \$5.—Sold by T. WALKER & SON, St. John, N. B.
