

## HUNS PROTEST U. S. LYNCHING

After Shocking World by Atrocities, Object to Killing of German

Amsterdam, June 17.—Germany has lodged a complaint in Washington and asked for safeguards against such excesses as led to the lynching of Robert P. Prager at Collinsville, Ill., on April 4, according to a Wolff Bureau telegram from Germany, quoting Privy Councilor Simons, in reply to a question asked in the Reichstag. Privy Councilor Simons is quoted as follows:

"The lynching of Prager is a fact, and was committed for no other reason than that Prager was a German and sympathized with the German cause. The Swiss minister at Washington has lodged a complaint and asked for safeguards against such excesses."

"The United States admits the facts, but says that under the laws of Illinois it cannot interfere. The investigation is proceeding and legal steps are being taken for the future."

"The United States, which is allegedly warring against the Hun in the interests of humanity, bears the main responsibility for the crime. The American government permitted German hatred to be fanned amongst the American people. We cannot rest satisfied with the statement that the laws of Illinois are inadequate to handle such a situation. The American government must find ways to protect the rights and liberties of Germans in America."

Washington, June 15.—No complaint from Germany against the lynching of Prager has reached the state department, and as the Swiss legation, which has charge of German affairs in this country, it was said nothing had been received on the case. Some time ago the Swiss minister offered to pay Prager's funeral expenses, but the state department established he was acting for relatives, and not for the German government. The federal government has no authority to proceed against the lynchers, but the attorney-general threatened himself in the case.

## VOYAGEURS TRAVEL OVER FROZEN WASTE

Two Men and a Woman Arrive From Ungava, Fifty Days on Trip

Quebec, June 17.—The days of the old voyageurs and trappers are recalled by the arrival into civilization again of two Montreal fur trading companies' agents, who have reached Pointe des Monts after a 900-mile drive across Ungava by dog teams. They are M. Walt, of the Hudson Bay Company, and M. Berthe, of Revillon Freres. Mr. Walt was accompanied throughout the trip by Mrs. Walt, and all three of the party are said to be none the worse for their experiences. They will proceed forthwith to Montreal.

On the 10th of April last they started on their return trip from the northeastern part of Ungava. With experienced Indian guides to show them the way they covered the whole of the 900 miles in exactly fifty days. The trip was uneventful, except for the fact that when half way they came across ten Indian families suffering from the direct starvation. Many of the men, women and children were dying for want of food. As the supplies carried by the little party had been so regulated as to last only for the trip across the lone land, the meeting up with the starving Indians constituted a problem. However, the party and their guides finally decided to divide up with the needy Indians, and to ration themselves for the rest of the trip. They did, and when they reached the first outpost of civilization they had just exhausted their provisions, so closely had they figured out the amount of food to be consumed each day. Their dogs, however, were well fed throughout the journey, as it was realized that in them lay all hope of safety for the whole party.

On arriving at the River Moisie the provisions of the voyageurs were replenished and they proceeded on their way until they pulled into Pointe des Monts.

Messrs. Walt and Berthe relate that this year there has been a very heavy yield of fox skins in the extreme northern regions. They state that they must have purchased in the neighborhood of 3,000 pelts. As to other pelts they say the yield has been up to the average.

The little party, after reporting to Montreal headquarters, will make a return trip to the Ungava district later in the season.

### MUST USE SOFT COAL IN PLACE OF ANTHRACITE

Dr. Frink, provincial fuel administrator, received a cable on Saturday evening from Wales stating that two ships, with a carrying capacity of 5,000 tons each, will sail from the old land for this side in ballast. "It seems a pity," he said, "that these ships could not bring out cargoes of Welsh anthracite, but the rate of freight placed upon it by the ministry of shipping in Great Britain makes the price landed here very high."
