

## Their Medicine Chest For 20 Years

It is characteristic of those who have passed the allotted three score years and ten, to look back over the days that are gone and thoughtfully live them over.

I find myself, at seventy-one, frequently drifting back a quarter of a century, when I see myself in the little drug store I owned at Bolivar, Mo., making and selling a valuable compound to my friends and customers—was then known only as Dr. Lewis' Compound for Rheumatism, Liver and Bowel Complaints.

For many years while I was perfecting my formula I studied and investigated the various ailments of the human body, and became convinced that the main fault was not that they did not work on the bowels, but that their action was too violent and drastic, and that the system of the body was thrown out of balance.

After experimenting with hundreds of different compounds, I at last perfected the formula that is now known as Dr. Lewis' Compound, which I truly believe goes further

and does more than any laxative on the market today. The thousands of letters from users have convinced me I was right, and that the user of Dr. Lewis' Compound as a family medicine, even though he may have used it for twenty-five years, never has to increase the dose.

My knowledge of medicine and the results of its use in my own family and among my friends, before I ever offered it for sale, caused me to have great faith in Dr. Lewis' Compound from the very first.

And now as I find myself nearing the age when I must bow to the inevitable and go to another life, my greatest pleasure is to think of the day and the letters that each mail brings from people as old or older than I, who tell of having used Dr. Lewis' Compound for ten, fifteen and twenty years, and how they and their children and grandchildren have been benefited by it.

It is a pleasing thought, my friends, for a man at my age to feel that while he is still in this world, he has done something for his fellow man. A great satisfaction, my greatest happiness today, is the knowledge that tonight some thousands of people will take a Dr. Lewis' Compound and will be better, happier, and more contented than before.

Dr. Lewis' Compound

ST. LOUIS, MO. SMITHS FALLS, ONT., CAN.

## Grassick Elected Mayor By Large Majority

Borlase, Dr. Roberts, Mason, Peart, Perry and Froom Successful Aldermanic Candidates

By probably the largest majority ever given a candidate for mayoralty honors in Regina, Ald. Jas. Grassick was elected mayor of the city for 1920 on Monday. He defeated his opponent, Ald. Fred G. England, a colleague in the city council for several years, by a majority of 1,213 out of a total vote of 2,979.

Ald. Grassick scored a total of 2,084 as against 871 votes polled for Ald. England and he defeated his opponent in every ward in the city. In the aggregate out of every seven votes polled, five were cast for Ald. Grassick.

In the contest for the six aldermanic vacancies W. C. Borlase headed the poll with 1,980 votes and Dr. M. C. Roberts, W. E. Mason, J. Walton Peart, Ald. H. Perry and Ex-Ald. A. C. Froom were elected to the council in the order mentioned. The first five will serve for two years, while A. C. Froom is elected for one year to fill the unexpired portion of Ald. Grassick's term.

There is only a spread of six votes between Ald. H. Perry and Mr. Froom and with this small difference there is a possibility that a recount might reserve the positions of these two candidates giving Mr. Froom a two-year term instead of Ald. Perry, especially in view of the fact that there is some uncertainty as to the accuracy of the figures in one or two of the polling subdivisions.

The contest for public school trustee resulted in the election of H. E. Sampson and R. E. Turnbull, the two retiring candidates.

## Card of Thanks

"I wish to thank all those who supported me in the election on Monday and placed their confidence in me. It will be my endeavor to show the people of this city that I appreciate the honor they have bestowed on me and will do my best to show that I am worthy of their support. When I appear before you next time it is my hope that my record in the council will satisfy both those who put me there and the electorate at large."

W. C. Borlase

YOU CAN EARN \$50 PER DAY

With Improved Standard Drill Machine, Fastest and Simplest Drilling Machine on the Market. Drills through any material.

Has record of drilling 70 ft. in 10 gal. of distillate. One man can operate. Write for catalogue. Manufactured by Peterson Machinery Co., 1001 Third St., Portland, Oregon.

As a result of the election the composition of the 1920 city council will be as follows:

Mayor: Jas. Grassick; Aldermen: J. K. McInnis, S. C. Burton, Alex. Young, Col. McAr, A. C. Froom, Dr. M. C. Roberts, W. F. Mason, J. W. Peart, W. C. Borlase and H. Perry.

One of the features of the election was the large number of rejected ballots in the aldermanic contest. This was due to the fact that a considerable number of the ballots were marked for too few or too many aldermen. The number of rejected ballots was even more marked in the public school election, no less than 150 ballots having to be thrown into the discard.

## Children Cry FOR FLETCHER'S CASTORIA

WAS ALL CRIPPLED UP

"For many years I suffered with rheumatism and was all crippled up with it," writes Mr. John Friedmann of Rochester, N. Y. "For one year steadily I have taken Forni's Alpenkrauter. My rheumatism is now all gone; for two months I have been able to walk without the least pain; I feel like a new man." "Thousands," who had been tortured like Mr. Friedmann, have had the same experience. This old time-tried herb remedy is not sold through druggists; it is supplied to the people direct by the makers, Dr. Peter Fahrney & Sons Co., 2501 Washington Blvd., Chicago, Ill.

Delivered free of duty in Canada

## NEWS IN BRIEF

ROME.—Rear-Admiral Milo, who has acted as governor of Dalmatia as well as commander of the occupation forces in that country, has resigned the former office.

BERLIN.—Assemblyman Alfred Hencke, a Bremen editor, will probably succeed Hugo Haase, who recently died from wounds received at the hands of an assassin, as leader of the Independent-Socialist party in the Reichstag.

LONDON.—The right eye of William E. "Pussyfoot" Johnson, the prohibition worker and organizer, of the anti-saloon league, was successfully removed.

## Card of Thanks

I wish to thank the voters east of Broad St. for the splendid support given me during my campaign. I assure the Electors, that I fully appreciate their support.

E. A. Jolly

## Card of Thanks

For the splendid support given me for my Election as Mayor of the City of Regina, and for turning out in the severe cold weather to vote, I wish to thank the Electors most heartily

James Grassick

## Card of Thanks

For the splendid support of the Electors at the Polls on Monday last, I wish to express my sincere appreciation.

J. W. PEART

## CARD OF THANKS To the Electors of the City of Regina

I wish to extend my sincere thanks to all Citizens who assisted me so splendidly during my campaign and who have helped to elect me as Alderman of the City of Regina.

A. C. FROOM

## THE MAKING OF FAMOUS MEDICINE

How Lydia E. Pinkham's Vegetable Compound is Prepared for Woman's Use.

A visit to the laboratory where this successful remedy is made impresses even the casual looker-on, with the reliability, accuracy, skill and cleanliness which attends the making of this great medicine for woman's ills.

Over 350,000 pounds of various herbs are used annually and all have to be gathered at the season of the year when their natural juices and medicinal substances are at their best.

The most successful solvents are used to extract the medicinal properties from these herbs.

Every utensil and tank that comes in contact with the medicine is sterilized and as a final precaution in cleanliness the medicine is pasteurized and sealed in sterile bottles.

It is the wonderful combination of roots and herbs, together with the skill and care used in its preparation which has made this famous medicine so successful in the treatment of female ills.

The letters from women who have been restored to health by the use of Lydia E. Pinkham's Vegetable Compound which we are continually publishing attest to its virtue.

## Provincial Legislature in Session

(Continued from Page 1.)

"I want to congratulate the honorable member for Kindersley on his maiden address to this assembly. I know something of the difficulty of standing up here for the first time. I went through the experience and there was an added responsibility because I came here first as a minister as well as a new member. I know something of the feelings that animate a man when he addresses an assembly like this for the first time. It is different from a public meeting. There you have a chance of impressing the audience but here you have a lot of hardheaded old and young men who have been making speeches themselves on a great many occasions and are very critical and hard to impress. I congratulate the member for Kindersley on his effort.

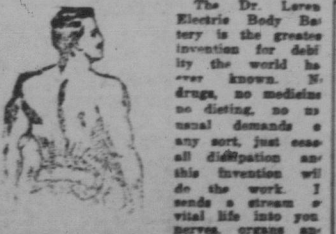

"I do take exception, however, and in the most kindly manner, to his description of himself, which was also used by the leader of the opposition, as the first representative of the Farmers' movement in this legislature. When did I cease to be a representative of the Farmers' movement in this legislature? When did forty other men sitting round here cease to be representatives of the Farmers' movement in this legislature? The Farmers' movement since the earliest days of the Saskatchewan legislature has been represented in these seats. When the first government was constituted, who was called in to take the portfolio of agriculture but the president of the Saskatchewan Farmers' movement of that time, Mr. Motherwell."

Mrs. Ramsland (Pelly), the first woman member of the house, made her maiden speech during the afternoon. Her first effort was well received and she was accorded a hearty ovation.

British subjects, either by birth or naturalization only, will be entitled to become commissioners for oaths in the future, with the passage of a bill which was given its second reading in the Saskatchewan assembly on Thursday. The bill is also designed to re-introduce the former policy of making such appointments permanent instead of being subject to renewal annually.

Friday's sittings were very brief, lasting a little less than three-quarters of an hour, the house adjourning at 3.45 to hear an address from General Sir Arthur Currie. Notices were given of intention to ask the government a number of questions on Tuesday by different members of the house, the questions dealing with employment, motor licenses, village consolidated schools, road surveys and expenditures for roads, bridges and ferries in the separate constituencies.

## Men, When in Chicago Come and see for Yourself

The Dr. Loren Electric Body Battery is the greatest invention for health by the world has ever known. It is a simple, safe, and effective remedy for all ailments. It is a high-grade battery, requires no charging with vinegar or soda, is 100 per cent. rubber applied, gives 400 to 500 amp. current, and is sold at a low price without added cost for battery books. Write today for Free Illustrated Folder. Price 10c.

C. Loren Electric Works

2240 Lincoln Avenue, CHICAGO, ILL.

## Riots in Kitchener, Ont.

KITCHENER, Ont., Dec. 1.—The name Kitchener stands as the name of this city, following a victory in the council chamber by the Kitchener-favoring element of the community. The council chamber was packed with a deputation representing returned soldiers, labor men, the manufacturers' association, the Daughters of the Empire, the Women's Canadian club and the board of trade, all demanding that the city council turn down the finance committee's report recommending that a bylaw be submitted to the people on the question of changing the name of Kitchener back to Berlin.

Aldermen Bitzer and Bowman, who are generally held responsible for the agitation to shift the name, failed to appear at the meeting.

When the contentious report was submitted, an amendment was offered providing for striking out the clause, and this was unanimously carried.

Mob rule prevailed here tonight following the council meeting. Alderman Bitzer, to whom was attributed the starting of the agitation, was made to kiss the Union Jack and rushed to the lake in Victoria Park and ducked four times.

Later in the evening, the mob proceeded to the Lancaster club and breaking their way in, seized W. D. Euler, M.P., whom they took over to the G.W.A. club rooms. They demanded that he kiss the flag and apologize to the returned soldiers. Mr. Euler refused and was severely beaten being knocked senseless.

## Foster's Weekly Weather Bulletin

WASHINGTON, D.C., Nov. 29.—Warm waves will reach Vancouver about Dec. 1, 6 and 11, and temperatures will rise on all the Pacific slope. They will cross crest of Rockies by close of Dec. 2, 7 and 12, plains sections 3, 8 and 13; meridian 90, great lakes, middle Gulf States, Ohio-Tennessee valleys 4, 9 and 14; eastern sections 5, 10 and 15, reaching vicinity of Newfoundland about Dec. 6, 11 and 16. Storm waves will follow about one day behind warm and cool waves about one day behind storm waves.

These disturbances dominate the weather of North America from near Dec. 11 to 15. That half of the month will be unusually quiet; as the old folks used to say it will be a "weather breeder." A high temperature wave will cross meridian 90 near Nov. 30; following it temperatures will be a little lower following each disturbance till near Dec. 16, when the coldest waves of the month will cross meridian 90, moving eastward.

Not far from December 14 signs of a great change in weather conditions may be expected. Weather-wise people will see those threatening and will begin to prepare for them, but other people, whose perceptive talents are blanks, will arrange for an outing, for an Indian summer excursion and, like the poor mouse, will walk, musingly, into the trap. Those who read these Bulletins will not be caught in that catatonic. Oliver Wendell Holmes expresses my thought where he says: "This is not an accident but an inevitable result of long incubating causes; inevitable as the cataclysms that sweep away the monstrous births of primeval nature."

I might repeat that "Coming events cast their shadows before." If we are not blind to nature's warnings we may see the signs long before. If you can not see them go watch the wild birds, they will tell you; or if you are not acquainted with the birds watch the tame goose. The despised spider has saved armies of men from destruction; watch the spider, he will not build any new webs just before the coming storm.

What more can I say to warn the people that terrible storms are coming and will soon follow the quiet weather period described above. Stronger warnings are expected between Dec. 14 and 17. I can not tell you where these great storms will be most severe but you should be ready for them at all times between Dec. 14 and 28.

These great storms will end the 165-day weather period and a new one will take its place, changing cropweather to some extent for the next 165 days. One-third of the farming section of North America will get drouth conditions, one-third will get too much rain and one-third will get normal cropweather, which is the best weather for crops.

My weather forecasts will be better than guessing. I will try to give all the general features of the coming cropweather through the newspapers that publish my work, but many localities get local weather that does not agree with the general cropweather, because the place from whence comes the moisture frequently changes and the mountain ranges and long high ridges control the precipitation.

## OUR ORGANISED GRAIN GROWERS

A VARIETY OF THOUGHT

There is a good story to the effect that in the hearing of a neighbour a man said: "It is a good thing we do not all think alike, or they would all want my wife." The neighbour, who apparently knew the lady referred to, retorted: "Yes! And if they all thought as I do nobody would want her."

## Differences of Opinion

This is a fair illustration of the value to society of free speech and a free press. In the columns of the Regina Leader of Tuesday, Nov. 11th, there appeared a slashing criticism by Rev. A. W. Keeton, Methodist Parsonage, Craik, Sask., of J. B. Musselman's "Review and Criticism of the National Conference on Character, Education." As was naturally to be expected the article attracted criticism. But, as another example of the saving grace arising from differences of opinion, there was received at the Central office, a personal letter, from a well-known Regina citizen, a communication, containing the following except: which indicates that Mr. Musselman was by no means alone in his thinking:

"Allow me to compliment you on the review which appeared last Saturday in The Leader, concerning the recent Educational Conference in Winnipeg. We are all prone, of course, to appreciate most the views which happen to coincide with our own. But, making due allowance for the fact that I thoroughly agree with what you wrote respecting religious instruction; the tendency to accept as gospel experts allege and the need for education for efficiency; I am still convinced that your article was a valuable one."

## CANADA'S NEW POLITICAL BUILDING MATERIAL

(By M.L.B.)

During a recent G.G.A. meeting held in Regina addresses were delivered by two well known public men and during the course of his remarks one of the speakers referred to the new political movement as a building, which he said "would have to be constructed of material taken from the two old buildings"—political parties—apparently overlooking, or ignoring, the ample supply of new material which is available at this opportune time.

The fact is recognised that the women of Canada are the largest body ever added to an electorate at one time and yet there is little indication that this fact is appreciated by our own public men; except some of the cabinet ministers at Ottawa. There is abundance of evidence that the new voters are considered important at Ottawa; but there seems to be very little evidence that they are even remembered in other quarters.

In the recent nomination of the provincial member for Kindersley the women voters were entirely ignored—if not actually barred from the meeting. Can one imagine any other large body of electors being treated in this way? Former governments have regarded voters of so much importance that they have been brought from Europe; and a few thousand—no matter what their quality—were considered a

## PREPARING A WINTER'S PROGRAM

Edward V. Darling, president of the Spring Valley Local, sends the following to the Central office, under a recent date, which is an encouraging account of the activities of his Local.

"Owing to the crop failure in this district several of our members have left for the winter. But we hope to keep our Association alive; even with a small attendance. We had a very lively meeting last Friday evening and it was resolved to have two meetings a month during the winter, in place of one as we had during the summer."

"Our next meeting is on Friday evening, Nov. 28th, and our programme is a debate on the Tariff question and a lively debate is anticipated. The topic is taken from the official suggestive program for the first night in December and any information or literature that you are able to send would be greatly appreciated."

## Reports For Publication

In the concluding portion of his letter Mr. Darling enquires: "Would it be favorable to you if this association sent a brief report of its activities from time to time for publication?"

In reply to the latter it cannot be too clearly understood that the Publicity Department of the Saskatchewan Grain Growers' Association is eager to receive brief accounts of local happenings, which should be addressed to the above department and not to the Grain Growers' Guide, as has frequently been the case. And in spite of being accused of repetition local secretaries would be conferring upon themselves, the Central association and the local newspapers, if they would also send short reports of their local activities to the local newspaper, which is always ready to receive such items for publication.

The fuel to keep the association ideals aflame is to "Keep the home fires burning." The educational work of the association in the past has been the chief factor in building up its various activities and in view of the added responsibilities the educational work should not only be continued, but intensified. Much valuable work has been done in the "little red school houses" meetings during the winter months of the last decade; but the work has merely commenced.
