

Remarks:

We believe that the proposed Kelowna extension will not only be of great benefit to the valley but also to the entire province. The extension will provide a direct route from the Kelowna area to the Fraser Valley and the coast. This will enable the valley to give more business to its own products and to the coast. The extension will also provide a direct route for the export of the valley's products to the coast. This will enable the valley to give more business to its own products and to the coast. The extension will also provide a direct route for the export of the valley's products to the coast.
