MONEY IN POTATOES

Don't let any of it slip through your fingers

If the average crop is good enough for you, you are going to miss the big profit on your potatoes. The extra bushels are what count. With potatoes at \$1.00 a bag they are gold. Don't let them get away from you.

You should get 240 bushels to the acre. And you can if you start in early enough. Are you going to let bugs fly away with your profit? Are you going to sit down and let weeds and blight get in their work?

At the present high prices, the average yield of 120 bushels is not enough. It will net you \$48.00 to the acre over and above expense and labor. But expert potato growers have learned how to double the crop. The extra 120 bushels add \$80.00 per acre to the profit, making a total clear profit of \$128.00 to the acre.

What these men have learned has been gathered together in a little book entitled "Money in Potatoes." This is the best practical potato book we know. It gives you a chance to learn in a few hours facts that it took many years to accumulate.

The \$80.00 Coupon will entitle any bona-fide farmer to a free copy while they last. 16
