Lump Jaw

The first remedy to cure Lump Jaw was

Fleming's Lump Jaw Cure

and it remains today the standard treatment, with years of success back of it, known to be a cure and guaranteed to cure. Don't experiment with substitutes or imitations. Use it, no matter how old or bad the case or what else you may have tried—your money back if Fleming's Lump Jaw Cure ever fails. Our fair plan of selling, together with exhaustive information on Lump Jaw and its treatment, is given in Fleming's Vest-Pocket Veterinary Adviser. Most complete veterinary book ever printed to be given away. Durable bound, indexed and illustrated. Write us for a free copy.

CHURCH BELLS CHIMES AND PEALS

MEMORIAL BELLS A SPECIALTY FULLY WARRANTED

McSHANE BELL FOUNDRY CO.,
BALTIMORE, Md., U. S. A.
Established 1866

"What are marsupials?" asked the teacher, and Johnny was ready with his answer.

"Animals that have pouches in their stomachs," he said, glibly.

"And for what are these pouches used?" asked the teacher, ignoring the slight inaccuracy of the answer. "I'm sure that you know that, too."

"Yes'm," said Johnny, with encouraging promptness. "The pouches are for them to crawl into and conceal themselves when pursued."

FOR PIMPLES AND BAD BLOOD USE B. B. B.

Pimples are invariably due to bad or impoverished blood and while not attended with fatal results, are nevertheless peculiarly distressing to the average person.

Miss E. L. Lang, Esterhazy, Sask., writes:—"My face and neck were covered with pimples. I tried all kinds of remedies, but they did me no good. I went to many doctors but they could not cure me. I then tried Burdock Blood Bitters, and I must say it is a wonderful remedy for the cure of pimples."

For sale at all dealers. Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

"If when he arrives in New York he fails to produce documentary evidence of the discovery of the pole no one will be more amazed than Cook himself. Whether he got to the pole is a question that the scientists must decide when they have heard his evidence, but Cook himself is certain that he got to the pole. He has a certainty that is as calm, as immutable as the great pyramids. No one who met him at close quarters in Denmark can for a moment deny that."

PREPARING EXHIBITS

Directions as follows have been published to assist in preparing exhibits for the Dry Farming Congress to be held at Billings, Montana, October 26, 27 and 28:

1. Preparing Sheaf Exhibits of Grain.

Select desirable heads just as the grain enters the yellow ripe stage. Choose well-filled heads that will make a good representative showing for the type of grain which you desire to exhibit. Cut the straw close to the ground so as to exhibit full length of straw, or if the grain has been cut, select best heads with stems long as possible. Make sample not to exceed 200 heads. Tie with soft cloth or narrow ribbon just under heads, at butts and in center of bundle and place in darkened room to cure or ripen. When time permits, untie the bundle, spread out, moisten straws by sprinkling and strip all adhering leaves, polish each straw with soft cloth and re-bind the bundle with any narrow ribbon of appropriate color, tying firmly in at least three or four places. See that all heads are evenly placed, making one compact, circular bush. This is very important. Do not use string in tying bundles of grain. See that each sample is neatly and accurately labeled, wrap in thin, soft cloth and suspend, with the heads down, in a free current of air in a dry place and out of the bleaching effect of the sun.

2. Preparing Sheaf Exhibits of Forage.

Select the most leafy types to be found in the field, taking best and most erect individual specimens obtainable. Cut close to the ground, put in a loose bundle not more than four or five inches in diameter, loosely wrap in paper or thin, porous cloth and hang in the dark to cure. To retain color, forage sample must be dried or cured in the dark, but with plenty of dry air. When well cured, select the individual stems that have retained the best leaves with their leaf color and make up exhibit bundles 4 inches in diameter. Do not strip a single leaf or branchlet from the stem, since we are to show for forage value and want to retain all the leaves possible. Timothy, brome grass, orchard grass, millet and other grass samples are spoiled for forage samples by stripping. Tie neatly with narrow ribbon in three or four places. It is desirable to take samples giving full length of stems at each cutting of clover, alfalfa or other forage cut more than once in the season, giving date of each cutting. A collection of native grasses should, in each instance, show seed or head, either in blossom, or full seed with full length of straw or stem.

3. Threshed Grain Samples.

Threshed grain samples should be run through a fanning mill to blow out all chaff, dirt, weed seeds and light-weight kernels. Samples should consist of 15 to 20 pounds.

4. Samples of Ear Corn.

If possible, the ear corn samples should be selected from the field and not from the crib after husking. Make up a sample of 12 ears as nearly uniform in size, shape and color as possible. See that exhibit ears are well-cured in dry air, and thus avoid formation of mold and the premature sprouting of kernels, which occurs when heat and moisture are both present.

5. Vegetables.

All vegetables and root crops should be selected with great care from fully-ripened specimens, washed and dried out in shallow trays in cool, well-ventilated cellars.

Are You Down-hearted?

Vigor and Grit are the two things you need with which to conquer. Life is not a bed of roses at the best. Hustle and toil are wanted to bring out the best there are in us. The man or woman, because of ill health, becomes discouraged, is a pitiable object indeed.

Keep your bodily health. That's the first step to success. Be definite in purpose. That's the second step.

BEECHAM'S PILLS

will help you achieve both. They will ward off disease, tone the body, make a new being of you. Taken in time, they positively prevent many of the serious ailments that are caused by a disordered digestion. By acting on the vital organs and carrying off the secretions of the body, they cleanse the system, purify the blood and strengthen the nerves. They put new vim and vigor into the body, new energy and courage into the brain, and you will find they quickly

Make Life a Joy and a Blessing

In boxes, with full directions, 25c.

W. J. McCALLUM

BRAMPTON, ONT.

My next importation of fillies, mares and stallions will arrive about the middle of September—a larger and better importation than ever. Our former importations have been sold within the shortest period of any importer in America, which proves we handle the best. We are satisfied with small profits, which also accounts for quick sales. If you want the best at the same price others are asking for an inferior class, I would strongly advise intending purchasers to wait and see my stock first. This importation, the majority of which will be bred, will have size, quality and breeding. The place at which these fillies and stallions will be disposed of is to be announced later. Address all communications to Brampton, Ont.

BRAMPTON

ONTARIO

IMPORTED SHIRE MARES FOR SALE

I am importing a choice consignment of young mares to arrive in October. They have been bred to some of the best stallions in England and are supposed to be safe in foal. Buy a registered Shire mare and start breeding heavy draft stock, the kind that fetch big prices.

Also three Imported Shire stallions for sale at reasonable prices.

Several splendid Berkshire boars for sale. Correspondence solicited.
