

AT THE GREAT SHOW

We beg to call the attention of the public in general to the magnificent display of

PIANOS and ORGANS

which will be exhibited at New Brunswick's Great Fair of 1907, at Fredericton. We can without fear of contradiction assert that never was there such a display. Every Piano has been *especially selected* and will represent the cream of Canadian workmanship.

The *Invincible* and well-known *Gerhard Heintzman* being *foremost* of these; also a beautiful *Brinsmead Piano*, manufactured in London, England.

We especially call the attention of the public to the *Gerhard Heintzman Player Piano*, which plays all the notes on Piano—88. Perfect transposing key-board, Automatic re-wind, etc.

These magnificent instruments will be represented by

The W. H. Johnson Co., Ltd.

Who are the Sole Agents.

This exhibit will be in charge of C. H. TOWNSEND and GEORGE A. PRINCE, who will be pleased to meet all their old and new friends.

Edgecombe Block, York St., Fredericton, N. B. Open Every Evening Until After Exhibition.

THE FRUIT CROP REPORT NOW OUT

Drought Has a Very Damaging Effect Throughout Ontario—Apples Good in Maritime Provinces.

Ottawa, Sept. 12.—Drought continues in practically all parts of Ontario and is having a marked effect upon the fruit crops, depreciating the quantity of everything not yet harvested from ten to twenty per cent, and in some cases even more. A narrow strip, however, along the north shore of Lake Ontario west of Cobourg has for some unknown reason, received rainfall, and as a consequence the quality of the fruit in that section is excellent.

The rainfall in Prince Edward Island and in parts of Nova Scotia has been quite sufficient, but not excessive. In the commercial apple region of Nova Scotia the conditions have been almost ideal, both with reference to rainfall and temperature. In Quebec and adjoining portions of Ontario the rainfall has been extremely limited, but local showers have fallen to such an extent as to make it probable that the later apple crop will not suffer severely from drought. British Columbia has had, in the main, ample rainfall, though a few sections have had less than the usual quantity.

Severe hail storms have been reported in Kent and Lambton, and heavy wind storms caused some damage through Huron and Simcoe counties. The damage from hail and wind has been not more than normal in British Columbia, but the effects of the hail storms of last month are showing very perceptibly on the apples, as the season advances.

Apples.

The August reports on apples show a continued decline in the quantity over last month. The drought will affect not only the size of the apples but is held responsible, along with very hot winds, for more than the usual quantity of "drops." Some correspondents are placing the damage in Districts 1, 2 and 3 at 30 per cent, of the crop; others are more conservative. The damage will be nearly 20 per cent, in shrinkage in size also.

The quality in the Maritime Provinces promises to be good, both in size and color and in freedom from fungous diseases, though some spots are beginning to show and may develop very rapidly between now and picking time.

The apples in Ontario will be clean and bright, but a small sample; wormy apples will be only slightly more numerous on the whole than last year. In Southern Ontario early and fall apples will be very light. Even the winter varieties, although a light to medium crop, is promised, will probably all go into consumption before the new year. In many sections in the southwestern peninsula growers say there will not be enough winter apples for local use.

District 2 will have a light crop of early apples, but a medium to good crop of winter varieties. The apples are likely to be small though with slightly more than the normal rainfall that defect may not be serious. Spies, Ben Davis, Russets, Kings and Baldwins both in No. 2 and No. 3 will be a medium crop. Spies are reported as particularly abundant in a few localities. The King trees are better loaded than usual, but do not form a large aggregate of the crop. The Baldwin, as usual, will show up well and will probably aggregate more than any other variety. In District 3 Baldwins are perhaps lighter than last year.

In District 4 the Duchess and Wealthy constitute the largest portion of the crop. The Fameuse is less than a medium crop. The winter varieties in this district are lighter than usual, and will contribute very little to the export trade.

The crop in Nova Scotia will be larger than last year and probably better in quality. This is the only district that reports a distinct improvement in the crop over last month.

The Gravensteins are decidedly cleaner and perhaps larger, but later than last year. The Ribstones, the Greenings, Spies, Ben Davis and Russets are all well loaded and better in quality than last year, but the Nonpareils will be very light.

Districts 5, 7 and 8 will not have enough apples for local consumption. British Columbia will show more than the usual quantity this year of very clean fruit. The quantity of No. 1's will be cut down severely on account of the hail-marked apples that are otherwise good. The hail is also responsible for the cracking and decay of some of the fruit on the trees.

Pears.

The same conditions which are affecting the apple crop are reducing the prospects for pears. Both early and fall pears will be light, and not more than half the usual crop will be marketed. Duchess, Anjou, Bose and even Kieffer are reported light; Bartlett and Clapp will be better. British Columbia crop promises to be good.

Plums.

Plums are continuing to drop and are not ripening satisfactorily, owing to dry weather, but there is no rot. The curelitis, which was reported on quite frequently last month, is reported to be less prevalent.

CARLETON WANTS GOOD GOVERNMENT

Successful Opposition Meetings Held at Windsor and Carleton Place in Carleton County.

Windsor, Car. Co., Sept. 12.—The local Opposition held an enthusiastic meeting in the Orange Hall on Monday evening and addresses were given by Mayor Munro and J. K. Flemming, M. P. P. The chairman, B. N. Shaw, after a few remarks introduced Mr. Munro as the first speaker, who was given a hearty reception. In a speech of forty minutes he showed that he was a man of ability, thought and business capacity. He was in the fight for honest administration and assured those present that they would get it in a few months, when the new government would be formed with J. Douglas Hazen as premier.

J. K. Flemming, M. P. P., was the next speaker and received a warm reception. He proceeded in his usual masterly and convincing manner to lay bare the recklessness of the present administration. He dwelt on the agriculture policy at some length, showing that the farmers of this province were not getting the encouragement that they were entitled to from this department.

The Central Railway deal was exposed, showing the hundreds of thousands of dollars of the public money were wasted.

The school book ring and the International Railway deals received the harsh treatment that they deserved. On Tuesday evening Mayor Munro and J. K. Flemming, M. P. P., addressed a political meeting at Carleton Place in the interest of the Opposition. A large and attentive audience greeted the speakers. Stephen Fowler, Jr., was chairman and introduced the speakers in his usual pleasing manner. The electors in this section when opportunity offers will give no uncertain sound and will unite with the rest of the province in hurrying from power one of the most reckless and incapable administrations that ever had an existence in this fair Dominion of ours.

THE BUNCO MEN GOT THE CIGARS

St. John, Sept. 12.—Alfred Bowen, of Wheatley River, P. E. I., came in on the Boston express from New Hampshire. At Vancouver he was held up by a plain clothes man, who examined his luggage, and finding a box of cigars, demanded two dollars duty, which Bowen refused to pay. Then he was taken to a building in which another alleged official decided that a dollar and seventy-five cents would be enough. Bowen again refused to pay and they threatened to seize his baggage. He threatened legal action and the officials then gave up his suit case, but kept the cigars. Bowen is now wondering whether it was a bunco game.

DROPPED DEAD AT CHATHAM.

Chatham, N. B., Sept. 12.—Michael Hackett of Pennsylvania, aged 45 years, dropped dead tonight at the Bowser House while at supper. Deceased had come here a month ago with two daughters and niece, and was being treated by Dr. Morrissey.

Cupid and Coffee cause a lot of heart trouble—and both have grounds for it.

Responsible for many of the "drops." The June varieties are a light crop. There is likely to be an excellent yield of all standard varieties in British Columbia.

Peaches.

The commercial peach crop will undoubtedly be light this year. Many trees have been affected both by frost and the San Jose scale, but even vigorous trees are not well loaded, and the size will certainly run small. The dry weather, however, is not favorable to the development of fungus, so that there will not be the usual losses from that source. There is no prospect of any shipments from the southwest of Ontario. The short crop in the U. S. will check any imports.

Grapes.

Prospects for grapes are somewhat conflicting. The vineyards on sandy soil have suffered from the depredations of the Rose beetle. The drought is telling much more severely too in these vineyards than in those of a heavy clay soil. It can be said therefore that the crop will be light on sandy soils, with many failures, but almost if not quite a full crop on well cultivated clay soil.

Tomatoes.

The tomato crop is suffering less from drought probably than any other, but even the tomato crop is being reduced by the dry weather, and there will be much less than the estimated quantity for the canneries. The quality of the fruit is good. A moderate rainfall and freedom from early fall frosts will insure a medium crop.

Small Fruit.

Except in the Maritime Provinces, the small fruits have all been harvested, with the exception of blackberries. Prices have ruled even higher than was anticipated. Strawberries and raspberries were only medium in quantity and poor for the most part in quality. The drought shortened the crop severely. Blackberries will be almost a total failure in Ontario. Blueberries were an exceptionally heavy crop in Nova Scotia, New Brunswick and parts of Quebec, and owing to the shortened small fruit crop they brought exceptionally high prices.

New Stiff Hats

We have just opened a big line of the above Hats in all the new and fashionable shapes.

J. H. FLEMING

Fall Millinery

We are now making a fine display of Felt Hats in all the leading and up-to-date shapes.
