INSIDE A SUBMARINE. An Interesting Experience and One

Not Easy to Secure. Not Easy to Secure.

Climbing down ten rungs of an iron ladder into the interior of a submarine is like going into a boiler shop where there is one continuous, deafening, ear-splitting racket, like a dozen triphammers clattering a tatteo amid a grind and rumble and thump of machinery as if especially designed to burst your eardrums. At first the noise in that narrowly confined space is painful and bewildering. To make yourself at all heard you must shout into the ear of a c.mpanion. So intense is the strain that you marvel how day in and day out human ears can withstand the ordeal.

You find yourself inside what seems an enormous steel cigar, painted a peat peat gray a color which is account.
