The Khediye's action is believed to have been influenced by Russia and France. The British authorities await instructions from London.

Politely Warned Away. Sr. Peterseuro, Jan. 16.—Three Tarkish officers who recently came to Russia to inspect the Russian army and to get a better spect the Russian army and to get a better knowledge of the Cossack tactics and methods of warfare were entertained by the Ministry of War for three days, allowed to see several reviews and drills, and then sent off back to Turkey under a military guard, with the intimation that it would be for their interest not to be found again visiting Russia under any pretext whatso-

The Finns Are Angry.

ST. PETERSBURG, Jan. 16.—Much alarm has been caused of late by the restlessness manifested by the Finns, and there is good manifested by the Finns, and there is good cause to expect trouble in that direction in the near future. The Finns are very angry at the constant abridgement of their liberties, and threaten to revols if this is carried any further. The Government, on the other hand, is resolved to bring Finland on the same standing as the other provinces of Russia and to allow it no liberties whatsoever. To say the least, the present condition of affairs appears strained, and the Russian Government will certainly not be the one to give way.

New Mode of Canceling Stamps.

New Mode of Canceling Stamps. BERLIN, Jan. 16 .- In order to guard against the frequent frauds in the using o canceled postage stamps the Ministry of canceled postage stamps the Ministry of Finance proposes to use a new method of esnecilation, which has recently been invented by one Rezemblov. This will consist of a stamp having in its center a slightly raised circle which, when it cancels the stamp, also cuts a corresponding circle in the postage stamp. When, therefore, the attempt is made to ungun the stamp having in the middle falls out. fore, the attempt is made to stamp, the piece in the middl and becomes very evident if pas

Considering the Home Rule Bill. London, Jan. 16 .- A Cabinet Council lasting three hours was held to-day. financial terms of the Home Rule Bill are financial terms of the Home Rule Lin are said to be substantially arranged. In the first bill the ratio of Ireland's contributions to the imperial exchequer was 1-15th, totaling 23,242,000 per annum. The new proposals, based upon juster data, will make Ireland's contribution only 1-23rd, equaling £2,070,885 per annum. Another important feature in the Irish financial scheme is that a loan shall be granted from the imperial to the Irish exchequer to enable the Irish Administration to start fair.

The Panama Fraud. PARIS, Jan. 16 .- The Government is greatly irritated at the exaggoration of the Panams scandal by foreign journalists and is resolved to exercise to the fulless extent for the auppression of such reports the authority to expel obnoxious aliens. Today the expulsion was announced of signor Bernascoule, Paris correspondent of the Courrierie Della Sora, of Milan, and M. Alt. of the Courrierie di Napoli. M. Brandes, of the Berlin Tagblatt, will probably have to go. Carnot's intimates assert that he is capable of being as stern and as resolute in the enforcement of authority as any man who has ever ruled France. Should Carnot be compolled, his friends say, to face either a Monarchist or an Anarchist uprising, he would asponish the prople with his severity in crushing in-Papama scandal by foreign journal

Emigration Agents Active.

London, Jan. 15.—Hon. T. Mayne
Daly's accession to the head of the De-Daly's accession to the head of the Department of the Interior is resulting in a vigorous emigration policy being carried on in Great Britain. A feature of this new policy is the granting of increased commission payments to those steamship agents who encourage bookings to the Northwest instead of Australia. Vigorous efforts are also being made to increase the emigration from Norway and Sweden to Canada. The agents appointed in Great Britain are stationed as follows: Mr. Stewart, at Inverness; Mr. Fleming, at Dundee, Scotland, and Mr. Woods, ex-M.P.P., of Manitoba, in the English Midland Counties.

An American Baron.

An American Baron. London, Jan. 16 .- One of the curiosities f the British peerage is the Barony of Fairfax, which is held by an English-Fairfax, which is held by an Englishspeaking foreigner, whose ancestors have
for more than a century resided out of
England. The present Baron Fairfax is an
American by birth and descent, was educated in America, married an American
lady, and is now living in the State of
Maryland, although he has the right to sit
and vote in the British House of Lords.
This, however, he refuses to do, as it is
absolutely necessary that he should be
naturalized as an Englishman and take the
oath of allegiance to the British crown
before taking his title or assuming his seat.
The baron considers the title of American
citizen good enough for him.

To Fival St. Peter's.

To Rival St. Peter's. Rome, Jan. 16.—Cardinal Parocchi has submitted to the Pope a scheme for adding another to the Catholic edifices of the another to the Catholie edifices of the country. The cardinal's scheme is to erect on the Monte Vanicule a church with a cupola equal in size and effect to that of St. Peter's, the cost of which is to be derayed by contributions of the Catholies throughout the world. Kound the sacred edifice it is proposed to group the ecclesiastical colleges of the different countries that are now situated at Rome. The further consideration of the proposal will be submitted to a commission of will be submitted to a commission of cardinals. The estimated cost of carrying out the scheme is about £4,000,000, and i calculated that its construction would ve employment to 14,000 workmen for

The Amercian Duchess. LONDON, Jan. 16 .- The American Duches Maribosough has effectually set at rest all the ill-natured and prejudiced reports all the ill-natured and prejudiced reports that narrow-minded people have set afloat touching the unpleasant relations that were supposed to exist between her and her stepson, the new Luke of Marlborough, by, in the most generous manner, giving him a clean deed of gift to all the repairs, improvements, additions and alterations she had caused to be made at Blenheim, where she is never likely to reside again. By this act of liberality and respect for the memory of her dead husband the Duchess has won golden opinions from all the Churchill contents. LONDON, Jan. 16 .- The National Con erence of miners at Birmingham, as had een expected, voted a resolution in favor been expected, voted a resolution in lavor of a statutory eight hours' working day almost unanimously, only two delegates holding up their hands against it; but those delegates represented 25,000 Durham miners, and as the Northumberland men also prefer to get their working day shortened by their own efforts the minority opposed to legislative interference is still a very respectable one. The bill, however, is to be introduced during the coming session, and the action of the Birmingham conference is certain to influence considerably those members who have heretotore been sitting on the fence, or, as the cant phrase of British politicians puts it, "have been keeping an open mind." It is probable that on the motion for second reading one of the Durham labor members will move a direct negative, and the resultant division will show some curious crossof a statutory eight hours' working day

TRIESTE, Jan. 16.—A terrific storm has swept this city since 10 o'clock this mornswept this city since 10 o'clock this morning. Sleet or snow has fallen incessantly and the wind blew a hurricane. Half the trees in the streets were snapped of close to the pavement and four tram cars tumbled from the tracks. It has been impossible for vessels to enter the harbor. An Italian bark which tried to come in at moon was battered by the ice to a wreck in sight of the docks and foundered with all on board.

Two small vessels are reported to have been wrecked off Point St. Andrea. A large wave broke over part of the water front in the early evening and flooded the streets near by. Two cabs with horses and drivers were caught in the current where the water was receding and were carried into the harbor and drowned. Fifty persons have been injured by falling trees, tiles and chimneys.

A Jolly Time in Prison. London, Jan. 16 .- A Paris correspondent says that the imprisoned Panama directors says that the imprisoned Panama directors have a pretty jolly time of it in the prison of Mozas, which is evidently not so uncomfortable as people believe. Their cells are well warmed and their beds almost luxurious. The authorities have even allowed them to supply themselves with articles of toilet not included in the prison rules. Their meals, too, are very different from the ordinary food, the restaurant outside being permitted to furnish them with delicate dishes. They drink good Bordeaux and Mocha coffee, washed down with a glass of brandy from their own cellars. Here is a menu of M. Cottu: Veal chop with potatoes, duck with peas, cheese and fruit, bread, a bottle of Bordeaux and a glass of charrenes. Everybody in the prison, we are told, treats Bordeaux and a glass of chartrouse. Everybody in the prison, we are told, treats diama, Ohio and Michigan. LONDON, Jan. 17.-A dispatch from Lendon, Jan. 17.—A dispatch from Messina states that the collision between the Italian steamer San Marco and the French steamer Algeric, resulted in much greater loss of life than was at first reported. The steamers collided Sunday night in the Straits of Messina and both sank. Five of the persons on board the Algeric were saved, but the fate of the others is not known, and it is supposed they were drowned. Seventeen persons were saved from the San Marco. Two of her crew are missing and are presumably dead.

A TRAIN ON FIRE !

Frightful Accident on a Russian Railway Line.

Forty-Nine Dead and Twenty Terribly Burned and Injured.

St. Petersburg, Jan. 17.—As a train omposed of several cars filled with recruits was running from Statusk to Samara to ay flames burst from the foremost carwas running from Statusk to Samita to day flames burst from the foremost carriage. The train was going at full speed and the tongues of fire swept backward, and in a few minutes all the cars were blazing. The engineer did not stop the train until he had ran a considerable distance. In the meantime there was a scene of indescribable confusion in the cars. The recruits—or, at least, as many as could do so—loaped from the windows and doors. Some of them landed uninjured in snowbanks, while others, who landed in the cleared track were killed. Those who were unable to get out of the cars were burned to death, for the train was entirely consumed. Some of the men were terribly burned before they jumped. When the confusion bad somewhat subsided, the officer in charge of the recruits, who had saved himself by jumping, called the roll of his men. It was found that 49 of them were dead and 20 roll of his men. It was found 49 of them were dead and 20 bly burned and otherwise injured. terribly burned and otherwise injured. It is supposed some of the men in the forward car were skylarking and upset the stove. The draft caused by the onrushing train caused the flames to spread with such great rapidity that nothing could be done to extinguish them. It is claimed the engineer was guilty of criminal negligence in not stopping the train as soon as he saw

The Corner in Pork.

Press dispatches state that "the clique began buying pork during the cholera scare, when it was going begging at \$10 a barrol. Manipulation aside, the mainspring under the market is the shortage of hogs. Each day has added some evidence of the strength of the situation. The scarcity of hogs at this season is largely attributed to the plenomenal meteorological conditions in the spring, when it rained so long that the farmers began to think they would not have a chance to plant any corn. What to do with the hogs was a question with no corn to feed them on, and they concluded that it would be better to take what they could get for their pork products then than run chances for a lower price. The consequence was that there was a very free movement in pork last summer, which left a slim home contingent. One report states that the probable percentage of hogs for January, February and March of this year will be but 68 per cent, of the supply of hogs for October, November and December of last year. The estimate includes the States of Hilippie, Livra, Wisconsin Minnescoia, South

the vaulted roof of St. Paul's Koman Catholic Church rang with the echoes of such a powerful sermon as was preached in that edifice Sunday night by Archbishop Walsh to the members of the League of the Cross. In beginning his grace stated that he would deliver a temperate sermon on a temperance subject, which would appeal to the roason and conscience of all who sat before him. "Temperance," he said, "may be said to enter into all other virtues. It is what is called a cardinal virtue, other virtues changing or depending upon it. The first law God imposed on man was abstinence, and before he fell temperance was the great law of man's life. Sin came, and with it revolt, rebellion and disorder, creation becoming like a broken instrument, giving forth discordant sounds instead of harmony. Think of the self-denial exercised by him on that occasion. As to our motherland, we Liberals have the highest appreciation of her greatness among the nations and of her truest glories—the freedom of her people and the freedom of her trade. The Liberals fought the battles for English irredom in Canada, and they won. We are now burnishing our weapons for the final conflict in Canada in favor of English principles of trade. We, too, can thrill with sentiment for the home of our fathers, and sentiment counts for much in the making of nations. But, how dare men stand up under a Canadian sky and tell us, as they do, that the only loyal sentiment we may feel must be for the Erlish Isles? Yes, sentiment counts for much, and there is a "As with each portion of the human body, each member lending its support to the whole, so it should be with society, all contributing to upholding it, and all working for its elevation. What does the drunkard do? Does he not violate every law of society, often to the extent of murder? The habit is a social evil of fearful megnitude. Who fill the jails but drunkards and whose children fill the industrial schools but theirs? It is also an awful domestic evil, and just here, in the hones, is where the results of the habits are heartrending to witness. Children are bound by the law of nature as well as the law of grace to revere their parents. Does the drunken bully of a young man, cursing may feel must be for the British Island sentiment counts for much, and the flood of sentiment and pride and l our own land, ready to burst for
