## DR. WILLIAMS' PINK PILLS MAKE

Just because she is a woman, there are times when every woman needs help and strength in the form of a blood-building tonic.

To thousands of girls and women Dr. Williams' pink pills have proved a blessing because they enrich the blood, give strength and restore tone to the aching nerves. The anaemic girl who is languid and pale, the wife whose back feels like breaking: the matron whose health fails as she reaches middle age-for all such sufferers, Dr. Williams' pink pills are invaluable, because ill-health in woman is usually caused by poor blood or insufficient blood. These vills have cured thousands of others, why not you? Mrs. D. Morine, Wallbrook, N. S., says: -It is impossible for me to say too much in praise of Dr. Wil-Hams' iPi k Pills. I have been a great sufferer from those troubles that make the life of so many women an elmost constant misery. Pains in the back and side racked and fortured me. My rerves seemed to give out, and at times I could do no house work, and only women who have similarly suffered, know what I endured. I tried medicine after medicine without any benefit, and was finally per-suaded to try Dr. Williams' Pink Pills. Soon after starting the pills an improvement and as I continued their use my health and strength returned and I now feel as well as ever I did in my life and I am relating my experience merely in the hope that It my lead some other suffering woman to renewed health. I may add that my mother suffered from rheumatism so badly that she had to use a crutch and Dr. Williams' pink pills completerestored her to her usual good

When I came back I worked hard at the African languages, for the pure love of them, The idea of teaching came to me when a lady wrote to me that she had been searching everywhere for someone to teach her Zuiu, and that she had been recommended to me. My class in King's College commenced in 1901, and was recognized by the University of London in 1910. My pupils have included all kinds of people University men going out there to take up government posts, missionaries, and even a traveller for Singer's sewing machines who wanted to become eloquent 'sweet" as in Tennysonian days, but in the language of the East Africans, alert and thoughtful) passed me in in order to persuade them of the vir-

two years in research work among the coast tribes of British East Africa. I had all kinds of experiences out there but not a single disagreeable one. I ther, who the year after came across the Stanley expedition, went out to was a guest in a native's house, and was most hospitably treated. Everything was primitive, but delightfully clean. All the members of the household had a bath every morning-not a European bath, of course. They stand bolt upright and pour the water WOMEN WELL over them. They are diligent users of the tooth-brush also. Looking out of the window in the early morning one sees them going about brushing their teeth in the open air. I found the food very good indeed, and tea is drunk a good deal. The kindness shown by the family I visited, to their servants impressed me very much. A bedridden old retainer who lived in a house in the village had expressed a fervent desire to see the stranger and the mistress at considerable inconven-

ience to herself took me there." A good deal of Miss Werner's time was spent among the Gallas, an interesting tribe living some little distance from the coast. The headman of the tribe had invited her there. Their huts are all built in a row facing East, so that when they wake they behold the rising sun. The principal furniture is a bed made of ederiferous herb, over which a cow or call

skin is spread. Penalties of Chieftainship "The Gallas have some curious cus-

At the ceremony of initiation a sacred song is sung which is known worked on the stud system. Albarea, the head man, recited it to me. For instance aman will not mention the name of his mother-inlaw, or of any woman who happens to have the same name. He may speak to her so long as he does not address her by name. The Galla who milks a cow would not drink the milk unless he has first handed it to someone else. When I asked Abaloni, a handsome Galia, to allow me to photo-graph him, he protested. "You have no right to rhotograph me," he said I have given you milk, and you have given me no present." I gave him an old mirror and a tumbler, and he was quite pleased, and allowed me to pho-

One is that before the narriage ceremony a young man must get a certain amount of honey beer for his father-in-law. Often when a young men is asked when he is getting married he will reply that he is waiting "until the

DOG-TAX DAYS are dogs black days, for in the first fortnight of the year, when the payment for a new license fell due, many callous owners contrived to lose their pets. Animals were turned out on the streets by scores to starve, to be captured by the police or to be befriended by some humane person or an institution like the Animals' Hospital in Kinnerton street, London, S. W. At the present time nearly sixty dogs are taken every day by the hospital; for some new homes are found; and for those that are old, blind, or diseased, there is a speedy
