Chamber's Journal,—Part A—May 1854. W. & R. Chambers, London & Edinburgh; A. H. Armour, & Co., Toronto; P. Sinchair, Quebee; J. Armour, Montreal; John Duff, Kingston; A. Bryson, Bytown; W. Allan Perth; J. Lesslie, Toronto and Dundas; R. R. Smiley, J. M. Graham, London, C. W.

We have received from A. H. Armour & Co., of this city the fourth part of this highly popular and instructive miscellany, which its talented and experienced conductors seem determined should continue, as heretofore, to hold the van in this impor tant department of the world's litature. The preent part fully sustains the high opinion we expressed of its predecessors. All classes of renders may ind in every page of Chambers something to amuse or instruct The preparation of each number winces the exercise of cor ect taste and sound ladgment, combined with much deligence and abour .- We have at present, no room for extracts: circumstance less to be regretted as the original dition of the work itself can be so readily produced sit is published, from the Booksellers mentioned t the head of this notice, at the very low price of en shillings per annum .- The present part contains oless than three of Mr. Chambers's excellent ries of papers on "Things as they are in Amee," treating of Ningara, Toronto, Hamilton, Lonin and the peninsula of Canada West. Although r. Chembers's stuy in the Province was but short, evidently made the most of his opportunities, and spaper will doubtless be read with equal interest both sides of the Atlantic. We can safely remmend this Journal as among the very best pubstions of the kind, that should receive a welcome every well ordered family; particularly in se days when trashy publications so much bund.

## ADVERTISEMENTS.

# KETCHUM'S PATENT

# MOWING MACHINE!

THIS CELEBRATED MACHINE stands without a rival, as the only Machine that ever worked in all kinds of Grass successfully. This Machine was thoroughly tested last year ("and in all kinds of Grass") and gave entire satisfaction to the Far-mers as the only Mower that would do its work well on uneven or rough land, or where there are dead furrows. Each Machine can be thrown out or in gear by changing a wedge at the ends of the shaft of the large or power wheel Oil caps are on each box which, by the use of cotton, will hold oil for a long time, and protect the bearing from dust and g it, &c. We have spared no pains in obtaining the g it, &c. We have spared no pains in obtaining the latest improvements to make this Machine of public favor, and take this occasion to caution Farmers against buying untried Mowers, as was the case last year, which will cause loss and disappointment .-This Machine is warranted to cut and spread, of any kind of Grass, from ten to fifteen acres per day, with one span of horses and driver, and do its work as well as by the best of Mowers with the hand scythe. We received the first Prize on the above Mower, at the Provincial Fair, at Hamilton, last year.

Price of Machine, with one set of knives, £25, with extra set of knives, £27 10s.

Manufactured and for sale by J. RAPALJE & Co., Port llope, C. W,

# REAPING MACHINES.

WE are also manufacturing and have for sale, BURRALL'S Improved Patent Reaping Machine, which took the first Prize at the New York State Fair, and trial of Reapers, held at Geneva, in the year 1852. There were cleven Reapers entered for the Prize, and this machine was declared by an unprejudiced committee of seven men, to be the best among them. And in all cases when worked with others, have come off victorious. This Reaper leaves the Grain at the side, so as to cut a field of grain without binding.

Price of Reaper 4.30. "This Reaper took the first Prize at the Provincial Fair, held at Hamilton, last Full." They are warranted to cut from ten to fifteen acres of any kind of Grain per day, with one span of horses and driver,—man to throw off the Grain,—and also do its work better than is generally done with the hand cradle,

Port Hope, C. W.

T. Hawonts, No. 44, King Street, Hardware Merchant, is agent for the above Muchines, for Toronto and its vicinity, 198-3.

J. RAPALJE & CO. .
