This year, Mr. Lowe revisited the same locality, occupying the time between the 6th and 30th of June in exploring that district, with the view of securing further specimens of marcellus. In this respect his zealous and praiseworthy efforts have not been crowned with success; not a single marcellus was seen during the whole period; probably the chrysalids had perished in consequence of the severity of the past winter. Several Papilio thoas were seen, but none taken.

Among his captures we observed two handsome examples of Limenitis ursula; also, fine specimens of Papilio troilus and asterias, Eudamus tityrus, Neonympha eurytris, Hesp, oileus, Alypia Langtonii, Spilosoma collaris Fitch (said to be a variety of Euchetes egle), Baptria albovittatta and several other species which we were unable to determine. There were also several handsome Diptera and Hymenoptera.

Among the Coleoptera was a female specimen of *Phanaeus carnifex*, captured near Windsor, an insect, so far as we know, never before taken in Canada; also, good examples of the following species: *Trichius bidens*, *Desmocerus palliatus*, *Clytus speciosus*, *Ædilus obsoletus*, *Cetonia fulgida*, *Cotalpa lanigera*, *Necrophorus Americanus*, *Callandra pertinax*, several handsome Curculios new to us, besides a number of other species less noteworthy.

BOOK NOTICES.

FIELD AND FOREST.—We have received the first two numbers of this new periodical, devoted to general Natural History, to which we tender a cordial welcome. It is an eight-paged monthly, uniform in size with our own journal, in every respect well got up, and containing many things to interest the Entomologist, the Botanist and general Naturalist. It is edited by our esteemed friend, Chas. R. Dodge, of the Agricultural Department, Washington. While this serial is to be devoted to Natural History in general, it will also be the Bulletin of the Potomac-side Naturalists' Club of the District of Columbia. Under the control of such an energetic and pains-taking man as we know the editor to be, we doubt not but that this journal will prosper, and be the means of furthering the interest of many departments of natural science. We sincerely wish it long life, and commend it to our readers. It is published at one dollar per annum; address—Editor "Field and Forest," P. O. Box 273, Washington, D. C.
