THE CAPELL IS THE FAN —For the COAL TRADE BECAUSE

- (1)—It allows of one operation, working a larger area than any other fan.
- (2)—It will clean out dangerous and palpable dust from a mine, by reason of its superior force and positive action.
- (3)—Because it costs less money to install, for every foot pound of actual work done on the mine; and is maintained and run cheaper than any other fan.
- (4)—It is incombustible and cannot burn.
- (5)—It gives adequate ventilation right to the end of the life of the mine. No replacing or diminution of air, like common fans. It will last the life of any mine.

The best reason for its use is the coal trade buys it; a Company having bought one, buy it always.
