

Notes and Comments.

THE salaries of the professors of the new Medical Department of the University of Texas range from \$2,500 to \$3,000.

IN some individuals the use of the ointment of chrysophanic acid will occasion a very marked pigmentation of the skin of the body generally.

THE number of new students in the Woman's Medical College of Kingston is four. We understand the whole number in attendance this session is seventeen.

MONTEVIDEO, South America, has a charity, the Hospital de Caridad, with an income of \$2,500,000 yearly, mostly derived from the sale of lottery tickets. Every effort is made to render it the model hospital of the world.

IT is now an open secret that the Local Government has instituted the dual system of attendance for the visiting physicians and surgeons of the Victoria General Hospital. There will be two physicians and two surgeons on duty together instead of only one surgeon and one physician.

THE members of the Halifax branch of the British Medical Association, with a few guests, dined together at Wilson's Hotel, Bedford, recently. Although other engagements prevented a good many from attending, an enjoyable evening was spent.

THE twenty-third session of the Halifax Medical College has opened with an increased attendance of students. The college may now be considered to have thoroughly recovered from the temporary set back occasioned by the cessation of the final classes consequent upon hospital difficulties, and there seems every prospect that next year will see the largest attendance in its history. Another lecture room has been prepared for the final classes, and is being fitted with convenient seating accommodation.

THE International Medical Congress meets in Italy in 1893. To reduce the expense, and secure larger returns for the money, a company of responsible medical men has been formed in St. Louis, Mo. This company proposed to secure a vessel to sail from New York, having a capacity of four hundred or more, to arrange a trip of six weeks, visiting the islands of historic interest

New York Post-Graduate Medical School and Hospital.

TENTH YEAR—SESSIONS OF 1891-92.

THE POST GRADUATE MEDICAL SCHOOL AND HOSPITAL is beginning the tenth year of its existence under more favorable conditions than ever before. Its classes have been larger than in any institution of its kind, and the Faculty has been enlarged in various directions. Instructors have been added in different departments, so that the size of the classes does not interfere with the personal examination of cases. The institution is in fact, a system of organized private instruction, a system which is now thoroughly appreciated by the profession of this country, as is shown by the fact that all the States, Territories, the neighbouring Dominion and the West India Islands are represented in the list of matriculates.

In calling the attention of the profession to the institution, the Faculty beg to say that there are more major operations performed in the Hospital connected with the school, than in any other institution of the kind in this country. Not a day passes but that an important operation in surgery and gynecology and ophthalmology is witnessed by the members of the class. In addition to the clinics at the school published on the schedule, matriculates in surgery and gynecology, can witness two or three operations every day in those branches in our own Hospital.

Every important Hospital and Dispensary in the city is open to the matriculate, through the Instructors and Professors of our schools that are attached to these Institutions.

FACULTY.

Diseases of the Eye and Ear.—D. B. St. John Rousa, M.D., LL.D., President of the Faculty; W. Oliver Moore, M. D., Peter A. Gallan, M. D., J. B. Emerson, M. D.
Diseases of the Nose and Throat.—Clarence C. Rice, M.D., O. B. Douglas M. D., Charles H. Knight, M. D.
Veneral and Genito-Urinary Diseases.—L. Bolton Bangs, M.D.
Diseases of the Skin and Syphilis.—L. Duncan Bulkley, M. D.
Diseases of the Mind and Nervous System.—Professor Charles L. Dana, M.D., Graeme M. Hammond, M. D.
Pathology. Physical Diagnosis, Clinical Medicine, Therapeutics, and Medical Chemistry.—Andrew H. Smith, M. D., William H. Porter, M. D., Stephen S. Burt, M. D., George B. Fowler, M. D., Frank Ferguson, M. D., Reynold W. Wilcox, M. D.
Surgery.—Lewis S. Pitcher, M.D., Seneca D. Powell, M. D., A. M. Phelps, M.D., Robert Abbe, M.D., Charles B. Kelsey, M. D., J. E. Kelly, F.R.C.S., Daniel Lewis, M.D.
Diseases of Women.—Professors Bache McEvers Emmet, M.D., Horace T. Hanks, M.D., Charles Carroll Lee, M.D., LL.D., J. R. Nilsen, M. D., H. J. Boidt, M.D.
Obstetrics.—C. A. von Randow, M. D., Henry J. Garrigues, M.D.
Diseases of Children.—Henry Dwight Chapin, M.D., Joseph O'Dwyer, M. D., J. H. Ripley, M. D., Aug. Caillé, M. D.
Hygiene.—Professor Edward Kerschner, M. D., U. S. N.
Pharmacology.—Professor Edward Bagoe, Ph. B.
Electro-Therapeutics.—Wm. J. Morton, M. D.
