TESTS FOR GLUE AND GELATINE.

A new method of testing glue and gelatine is described by M. V. Cambon in the "Moniteur Scientifique." He remarks that the usual test of a gelatine has been that of its adhesive property, or its capacity of joining substances after drying.

Based on these facts, the "fusimeter" has been devised by M. Cambon, consisting of a conical crucible of polished brass, of a few cubic centimetres' capacity, which receives the gelatine solution, a small cylinder being introduced and the solution being allowed to harden. The whole appliance is hung in a water bath, which again is heated by another water bath. As soon as the gelatine has reached its melting point, the small

BRADSTREET'S

Offices throughout the civilized world

Executive Offices, 346 and 348 Broadway
NEW YORK CITY, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring verifying promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices.
