

**Annex 1: Minimal requirements for the medical file to be used for the TUE process in the case of asthma and its clinical variants**

The file must reflect current best medical practice to include:

- (1) A complete medical history;
- (2) A comprehensive report of the clinical examination with specific focus on the respiratory system;
- (3) A report of spirometry with the measure of the Forced Expiratory Volume in 1 second (FEV1);
- (4) If airway obstruction is present, the spirometry will be repeated after inhalation of a short acting Beta-2 Agonist to demonstrate the reversibility of broncho constriction;
- (5) In the absence of reversible airway obstruction, a bronchial provocation test is required to establish the presence of airway hyper-responsiveness;
- (6) Exact name, speciality, address (including telephone, e-mail, fax) of examining physician.
