

Physics Journal B (Proc. Phys. Soc.) 1968, Vol. 1, Dec. 2, 783-4, V. Degen et R. W. Nicholls. *Energy Resonance Between Molecular Species in Co²⁺ Gas Lasers*, *Phys. Letts.* (soumis) 1968, R. W. Nicholls. *Excitation Mechanisms of Microwave Discharges in N₂: The Role of Vibrationally Excited Nitrogen*, *J. Chem. Phys.* (soumis) 1968, B. Brockelhurst et R. W. Nicholls. *A Critique of Excitation Kinetics of Active Nitrogen Afterglows*, *Reports on Progress in Physics*, (soumis) 1969, J. Anketell et R. W. Nicholls. *Fluorescent Excitation of the Free CN Radical*, *Nature* (en préparation) 1968. J. Myer et R. W. Nicholls.

Excitation par choc avec effet de triboluminescence et études des processus d'arrachement: *Shock Excitation of Atomic and Molecular Spectra*, *Journal of Chemical Physics*, 26, 423-424, 1957, R. W. Nicholls et W. H. Parkinson. *Shock Induced Physical and Chemical Surface Changes on Oxide Powders*, *Canadian Journal of Physics*, 36, 625-627, 1958, R. W. Nicholls et W. H. Parkinson. *Laboratory Astrophysics*, *Journal of the Royal Astronomical Society of Canada* 53, 109-116, 1959. R. W. Nicholls. *Ablation Studies in a Shock-Tube*, *Journal of Applied Physics*, 30, 797-798, 1959, R. W. Nicholls, W. H. Parkinson et H. Van der Laan. *The Laboratory Excitation of Meteoric Spectra in Shock Tubes*, *Journal of the Royal Astronomical Society of Canada* 53, 223-231, 1959, R. W. Nicholls, M. D. Watson et W. H. Parkinson. *Spectroscopic Temperature Measurements in a Shock Tube Using CN as a Thermometric Molecule*, *Canadian Journal of Physics* 38, 715-719, 1960, W. H. Parkinson et R. W. Nicholls. *Shock Excitation of Solid Aromatic Hydrocarbons*, *Nature* 188, 568-569, 1960, R. W. Nicholls et M. D. Watson. *The Spectroscopy of Shock Excited Powdered Solids*, *Applied Optics* 2, 919-930, 1963, R. W. Nicholls, W. H. Parkinson et E. M. Reeves. *Laser Excitation of Powdered Solids*, *Nature* 204, 1295, 1964, H. I. S. Ferguson, J. E. Mentall et R. W. Nicholls. *Spectroscopic Temperature Measurements in Laser-Produced Flames from Solids*, *Bulletin of the American Phys. Soc.* 10, 492, 1965, J. E. Mentall et R. W. Nicholls. *Shock Tube Spectroscopy of Powdered Solids*, *Proc. of the Fifth Shock Tube Symp.*, NOL Silver Spring Md., avril 1965, pp. 111-122, R. W. Nicholls, et D. C. Tyte. *Spectroscopic Intensity Measurements on Laser-Produced Flames*, *J. of Chem. Phys.* 46, 2831-35, 1967, J. E. Mentall et R. W. Nicholls.

Spectroscopie de la combustion: *The Emission of the LA Bands and an Associated Violet Continuum in Oxy-Acetylene Flames*, *Can. Jour. Phys.* 33, 394-396, 1955, G. V. Marr et R. W. Nicholls. *Luminous Mantle of Fuel-Rich Oxy-Acetylene Flames I: Spectroscopic Temperature Measurements*, *Canadian Journal of Physics* 35, 1265-1274, 1957, G. V. Marr. *Luminous Mantle of Fuel-Rich Oxy-Acetylene Flames II: Free Radical and Continuum Intensities and their Influence on C₃ Emission*, *Can. Journ. Phys.* 35, 1275-1283, G. V. Marr. *Possible Reaction Mechanisms Associated with Emission of the C₃ Radical in Laboratory and Astrophysical Sources*, *Publications of the Astronomical Society of the Pacific* 70, 197-201, 1958, G. V. Marr. *Laboratory Astrophysics and Combustion Spectroscopy*, pp. 413-430, «Supersonic Flow, Chemical Processes and Radiative Transfer», AGARDEGRAPH (pub. D. B. Olfe et V. Zackay, Pergamon, 1964), R. W. Nicholls. *Spectroscopie des rayonnements ionisants et de faisceaux d'ions: The Ionization in Air Maintained by a Uniform Plane Circular Distribution of a Radioactivity*, *American Journal of Phys.* 22, 57-61, 1954, R. W. Nicholls. *The Ionization Maintained in a Gas Before a Thin Plane Uniform Circular Source of Ionizing Particles*, *American Journal of Physics* 22,
