were made that we were faced with a real Liberal organization and the people were saying that the event was "patronized" by the Liberal party.

Mr. Speaker: Order. If the hon. member will look at Standing Order 15 (3), he will see that any remarks he may make should be limited to the minister's statement and should not be designed to provoke a debate.

Mr. Gauthier: Mr. Speaker, I did thank the minister in the first place, because he likes to be thanked.

Just the same I want to draw his attention on the matter because all the constituents of Roberval were disgusted, including some of the most sincere liberal organizers.

I have pointed out to the minister in committee the projects concerning the small local industry. I think that in general, too much attention has been given to the large industry, the so-called millionaire industry at the expense of the small local industry. Yet it is the latter which provides jobs and not the large industry. Indeed, as soon as some aid is granted to the large industry, it abolishes jobs, while the local industry does the opposite.

The minister is well aware of that fact, since I have already drawn his attention on it. I hope he will take the matter in consideration because I know he is not stubborn. Indeed, he takes heed of criticism and I hope he will do so when announcing the establishment of industries in the Roberval constituency.
