	PAGE.		PAGE.
Milking machines not successful	41	Specific gravity of milk	42
Modified milk	105	Square cheese	101
Odor of milk	46	Stalls for cows	18
Opacity of milk	46	Strippings	39
Pasteurizing cream	84	Sugar of milk	46
Pasteurizing milk	104	Sulphuric acid for testing milk	51
Ploskop	49	Successful dairying	9
Pipette for Babcock test	51	Theory of Babcock test	56
Profit in manufacturing	9	Thermometer	48
Prime materials for food-soil, sunlight, air and water	10	Ties for dairy cows	18
Private dairying, advantages	64	Training cows	21
Private dairying, disadvantages	64	Transudation theory	39
Printing butter	90	Triple servants—breed, feed, wced	30
Pure milk important for towns	102	Udder:	
Raw materials of dairy farmer	9	Hard to milk	37
Ripening cream	84, 85	Leaks milk	38
Salt for cows	31	Different kinds	39
Scale of points for judging butter	92	Ideal	40
Skim-milk	10, 54, 93, 95, 96	Uses of Babcock test	57
Shallow pan creaming	68	Viscogen	105
Slime from centrifuge	78	Water trough for stable	20
Shipping butter	91	Washing dairy utensils	64
Size of cows	21	Whey	10, 54, 61, 95
Souring of milk	46	Whey tank	61, 94
Sour milk, testing	56	Whitewash	19
Special points in Babcock test- ing	55	Whipping cream	105
		Wooden floors in stable	18
		Working butter	89

PART II.—CO-OPERATIVE DAIRYING.

	PAGE.		PAGE.
Accumulator	13	Buildings for co-operative dairying	124, 125
Acidimeter	154-157	Butter:	
Acidity of milk for renneting	163	Granules	203, 204
Acidity of cream	199, 200	For market	208 211
Acid and rennet act differently on milk	159	Shipping boxes	209
Bandager	170	Tubs	211
Bandage for cheese	170	Tins	211
Best separator	197	Composition of	212
Boards of Trade	223	Not contain over 16 per cent. water	212
Brushes	135	Qualities described	212-213
