

STRIKE ON THE LUCKY COON.

Seine River Property in Which the Ore Runs From \$60 to \$70 a Ton.

WORK IN THE REPUBLIC CAMP.

Business in the Slocan District on Lemon and Springer Creeks is Improving.

Greville & Co. received word from the Seine River country yesterday that a vein second only to that of the Olive mine in richness has been discovered on the Lucky Coon property. The find was made last Monday, and the news was brought by John S. Campbell and John MacIntyre. The surface ore, Mr. Campbell says, runs from \$60 to \$70 a ton. The vein averages about 2 1/2 feet in width and widens as it goes down. The vein can be traced over across the property. Mr. Campbell says that this find is the richest since the discovery of the Olive vein in 1928.

The Lucky Coon is working two shafts, and each is down about 100 feet. Machinery has been ordered and work will be conducted on a large scale when it has arrived. At the Olive mine, they are working double shift and air compressor. It is not the intention to use the shaft for the purpose of ascertaining the depth of the deposit. The ore, which is a green chat and quartz, is of the same quality as the Olive mine. The Lucky Coon is a similar kind of property.

E. G. Garty Parker has received advice from H. L. Perry of the Republic camp that work will be commenced at once on the Lucky Coon property. The Republic camp is a large property, and the work is being done on a large scale. The Republic camp is a large property, and the work is being done on a large scale.
