BOLSHEVIKI WOULD PIT CLASS AGAINST **CLASS TO GAIN RULE**

"U" Professor Calls It an Attempt to Make Labor the Ruling Class.

Addressing the Men's Union of St. Andrew's Presbyterian Church last evening on the subject of "The Bol-sheviki Movement in Russia," Profes-sor Livingston of the Western University declared the movement is not con-fined to Russia, but has also spread in many other countries, where an at-tempt is made to make labor the pre-

minant element.

tempt is made to make labor the predominant element.

Prof. Livingston said the Bolshevi aim was the government of labor in the interests of labor.

It is an attempt to make labor the predominant element, because labor is the element which produces. Since the producers create wealth, it is the producers which should have a say in the administration.

The economic basis of life in Russia is agriculture. Instead of farming individually as in this country, the agriculturists in Russia work together in communities, sell their produce at the end of the year, and divide the p ceeds. The only relationship of the czar and government to these producers has been that of tax collector and policeman. The government stepped in PREMENDOUS INCREASE

A star salesman can switch lines completely, and still be a star salesman from the first day he goes out. He knows the game of selling.

That it is not necessary for a man to "work his way up" to the position of salesman, and proof that failures and poorly paid workers in other lines are the present the same time gain practical experience. "work his way up" to the position salesman, and proof that failures a poorly paid workers in other lines a develop this star salesmanship lity, has been demonstrated in thought of the star salesmanship.

A young man in San Francisco, who was formerly a carpenter, is now in the 5,000 a year class as a salesman. A ormer \$15 a week clerk in Chicago is ow selling goods to many of the argest firms in the United States, and largest firms in the United States, and has earned more than \$100 a day. Last year a man in Dayton, O., earned \$800 as a clerk. This year he has earned \$6,500 as a salesman and was recently promoted to sales manager.

A printer in Chicago decided he would stop trying to get ahead in a crowded field, where salary possibilities are studying the principles of scientific salesmanship he launched out and se-
