MARKET CLOSES BUOYANT IN FACE OF OPPOSITION

Biggest Day's Trading of the Week in Cobalt Stocks at Both Toronto Exchanges.

World Office
Friday Evening, Sept. 11.

To-day was the biggest market on mining stocks for the week. On both the Toronto exchanges the contest was so keen for stocks that it was found difficult at times to properly execute orders. Prices in many issues responded to the increased buying power, and profit-taking was accepted without the slightest concern in nearly every issue. Crown Reserve led in the volume of trading, but the older issues, such as Trethewey and Foster, sprang into greater prominence and made an active race for first place in the dealings. La Rose—So at 52, 100 at 6.25, 20 at 6.25, 100 at 6.21, 100 at 6.22, 20 at 6.25, 100 at 6.24, 100 at 6.25, 20 at 6.25, 100 at 6.24, 100 at 6.25, 20 at 6

the most buoyant disposition, despite the attempts of traders to bring about a reaction.

IN HEAVY DEMAND.

Chembers-Ferland Being Eagerly Sought After at Toronto and Montreal

Off the exchanges, Chambers-Ferland was the mining security most in demand yesterday, and several brokers affirmed that the sales of this stock out-numbered any even on the exchanges. Transactions on the stock were made generally at 75 cents, but instances were cited in which 80 cents had been paid. The recommendation which the property of this company has had from nine prominent mining engineers suggests that it will shortly be one of the biggest producers of rich ore in the camp. The stock is in very heavy demand at Montreal, and a wild market for the listed on the various expension.

Stewart & Lockwood say in their weekly letter: "We have had only one line of advice for our clients for the past four months, and that was to buy

past four months, and that was to buy good Cobalt stocks.

"Cobalt has again made good. It has been 'weighed in the balance,' and the only thing 'found wanting' is the people who are 'found wanting' is the people who are 'found wanting' the stocks.

"England, the continent and the United States have sent their experts and capitalists, who have gone to Cobalt filled with tolerant skepticism and have returned filled with wonvering amaze at the richness of the camp and the at the richness of the camp and the wonderful future of so extensive a field "Stocks are bound to advance. It is now a matter of getting in at the best figure obtainable. Our clients have made money and will make more."

Smelter Ready for Business.
A significant fact about Cobalt is that the Trout Lake Smelter is ready for

heavy losses to speculators who have continuously endeavored to depress these shares for many months. Several of the active securities have been sold short without regard to conse-quences, and a large outstanding short interest is still said to exist. There was a rumor around town yesterday that one broker had suffered severely by attempting to fight the rise in Crown

Strenuous Days for Brokers.

These are strenuous days for the brokers, remarked one viduals yesterday. "I and my office help worked till 11 o'clock last night and failed to catch up with our orders. I, with others, would welcome a slowing down in business for a day or two, but, of course, you have to take orders when they are presented." take orders when they are presented."

A significant fact about Cobait is that the Trout Lake Smelter is ready for business. This means that Cobalt ores can be smelted in Camada on a spot within easy distance of the mines. What this means in freight charges is easily estimated. Upwards of \$500,000 in machinery has been installed in the Trout Lake plant, and it is prepared to treat all grades of ores.

Short Seilers Are Hit.

Advances in several of the Cobalt stocks are believed to have caused heavy losses to speculators who have continuously endeavored to depress at 29.

BONA FIDE DEVELOPMENT TO MAKE COBALT FAMOUS

Provincial Geologist Says Losses Thru III-Judged Speculation Shouldn't Affect Field.

The Ontario Department of Mines has issued a report by Prof. W. G. Miller on the Cobalt district, in which the provincial geologist says:
"It avails nothing to sermonize on gambling in mining stocks. The writer wishes simply to make one point, which is that losses thru stock gamb-

which is that losses thru stock gamb-ling should not be charged up against the mineral industry. Mining is as le-gitimate as any other industry.

"If people who buy so-called mining stock will not take precautions, the industry is not to blame.

"The record of Cobalt camp has been seldom surpassed as regards the relation of dividend to output. The output to the end of 1907 was over output to the end of 1907 was over \$10,000,000 and over 50 per cent. of this was distributed in dividends. This record is, however, tarnished by the absurd stock gambling which has taken place in connection with many properties. It is to be hoped that the period of stock jobbing will soon be over and that the field will be developed on a more legitimate basis.

"The policy of leasing small tracts of land on a royalty basis, coupled with stringent working conditions, has been introduced into the camp. It is to be hoped that this system will be widely followed. It will give the man of small means a chance to invest his capital, and the camp will report to decapital, and the camp will tend to develop more rapidly than it has during the stock jobbing era of the past."

COBALT, Sept. 11.—(Special.)—At the Right of Way mine to-day, one vein at the 145-foot level widened in the drift to 16 inches of solid metal of smaltite, nicollite and native silver. It is very rich and considered one of the best on the property.
