THE MEN WHO MAKE THE CONCRETE POLES FOR THE HYDRO ELECTRIC.

NEW MINING METHOD.

There have been so many disastrous explosions of dust and gases in deep coal mines in various parts of the world, caused in many instances by the use of explosives in tearing the coal asunder, making it easy for the workmen to remove it with their tools, that a great effort has been made among engineers and mechanics to find a safer method of putting the coal in condition to be easily removed.

In Germany a system is being used that promises to go into general use. Instead of the powder or other powerful explosives being used, holes are drilled deep into the coal vein just as if blasts were to be inserted; but instead of the explosives that so often set off a lot of accumulated gas or dust, a pipe is inserted and a heavy pressure of water forced into the block of dry coal. The water finds its way into the crevices and produces others, and in a short time such a pressure has been brought to bear on the coal that it opens up and is ready for the men with their picks and shovels, and no dust or dry gas has been formed. It is stated this method is much safer, and is healthier, even more rapid, as there is no loss of time by the men waiting for a mine or shaft to clear itself of the poisonous fumes produced by the explosives.

The Perfect Corset for the
Woman of Good TasteWOOLNOUGH
Tailored-to-Order
CORSETS
\$3.50, \$6, \$10, \$15

Because no other than a specially designed and tailored-to-order corset will reflect in its perfect lines the individuality of the wearer. No one but the woman who is accustomed to a tailored-to-order can fully appreciate the vast difference in comparison with even the best makes of ready-to-wear.

See the Summer Models

They mean to you more comfort, better ventilation and besides have every new style feature as developed by our expert corsetiers.
