#### SONGHEES PARK BY-LAW

The people of Victoria have long cherished a hope that in course of time they might be in a position to acquire a portion of the Songhees reserve for the purposes of a public park. Such an institution is now almost an imperative necessity in the part of the city known as Victoria West. With the growth of the community on the west side of the arm the necessity is yearly becoming more imperative. In the year 1907, when the political necessities of the McBride government were more pressing than they are at the present time, the premier led the people of Victoria to believe that a large tract of the Songhees Indian reserve could be secured for park and other purposes free of cost, or practically free of cost. Using the Mayor of the city for that year as his instrument, Mr. McBride publicly announced that an order-in-council had been passed conveying to the municipality all that portion of the reserve lying north of the Esquimalt road. That order still stands, for all the citizens of Victoria know to the contrary. Why has it not been implemented and a promise solemnly given redeemed, low that the Indians have been removed and the way cleared for its redemption? Why are the retepayers of Victoria, in the face of such an obligation, asked to go to the polls on the 8th of November and vote for the payment of eighty thousand dollars for a small part of the reserve previously set apart for the purposes long kept in view? That is the question we ask citizens to seriously consider before easting their ballots on the eighty thousand dollar by-law on Wednesday next.
