THE WEEK ON

THE FUNERAL OF A

UNSETTLED SATURDAY

New York, Oct. 30.—The speculative one showed unsettlement during the short session of the stock exchange oday. The close of the week brought tome natural inclination to close upontracts and take profits. This was apphasized by doubts of what the sank statement, which was published fiter the market closed, would show. There were new questions raised regarding the foreign money position and its porbable bearing on the markets for stocks. The determination manifest by the Bank of England to maintain its control of the London money market received a discussion of the response totally to be made by they markets and the possibility of a further advance in the official discount rate of the Imperial Bank of Germany was revived. The part playsably the political outlook in shaping the policy of the Bank of England is receiving increased consideration, in view of the opinion expressed in London that a general election in January is now likely. The formal denial by the presence of the competition of copper interests or of an agreement to curtail production induced a recation from yesterday in strength in that group. There were points of strength here and there in special stocks but the prevailing tone of stocks was heavy. The decrease of banking cash revealed by the bank statement proved heavier than the estimates, but the loan expansion by the actual figures was unimportant. Bonds were irregular. Total sales and the fours coupon 1-4 per cent in the bid price on call since last week.
