AROUND THE CITY

Seven Houses.

The W. I. Fenton Land Company is building two houses on Seelye street and five on the West Side.

Anniversary.

At the residence of Mr. and Mrs. Robert Burgess, Kingston, N. B., Saturday evening last, about forty friends gathered to offer their congratulations to Mr. and Mrs. Burgess on the thirty-eighth anniversary of their wedding. A bouquet of 38 carnations was presented, also to Mrs. Burgess a handsome silver scallop dish, and to Mr. Burgess a gold mounted umbrella. Other tokens were received from friends and a most enjoyable evening was spent by those present.

DEAD BODY STILL THERE

Authorities should take some action toward giving proper burial to remains found in woods.

From what could be learned last evening the authorities have been rather slow in attending to their duties, when the decomposed body of a man has been allowed to remain in the woods near Musquash for days without protection from the weather and not being given a proper interment.

It was last Saturday that Ralph G. Day and his brother, Charles Day, of this city who were fishing along the banks of Bonny River, which empties into the Musquash River, came across the body of a man decomposed and lying in a clump of bushes. It was a gruesome sight for the sportsmen and immediately on their arrival at Musquash they reported the matter.

Up till last night it could not be learned whether or not the body has since been removed from the place where Messrs. Day found it. Coroner Roberts of the North End, was asked about the affair last night and said he had no official right to take the matter in hand but he had been communicated with and recommended that the coroner of the district be notified. He thought that the body should be removed to Musquash and buried.

The body is supposed to be that of Dennis Morris, a laborer. Morris had been employed in the Gregory lumber camps at Musquash and one day last February he left camp and has been missing ever since. It is thought that in all likelihood Morris became lost in the woods and had frozen to death. If the remains are those of Morris the body has now been lying in the bushes for nearly four months.

ADVANTAGE OF INCINERATOR FOR ST. JOHN

The prospects of having an incinerator built in St. John soon are very bright. The city commissioners have taken the matter up and His Worship Mayor Frink and Commissioner Potts are given authority to secure all the necessary particulars. Some estimate of the cost of the plant has already been secured, and the city council authorized the erection of a plant to cost \$50,000.

The site was selected last year and the situation at the foot of Broad street seems to be well suited for the plant. It has been said that the breeze there would eliminate any obnoxious gases that might be given off, but it has been pointed out by those who have studied the management of incinerators that they are no more objectionable than manufacturing plants. Other authorities point to the fact that incinerators are much less objectionable than decaying garbage in Westmount. It was said yesterday, the incinerator is one of the points of interest and the pride of the citizens. In fact the man who was responsible for its establishment had his picture placed in the City Hall and he had his name among the benefactors of the city.

In Westmount, the plant is modern and the power generated is utilized

DECIDE TO HOLD A BIG DOG SHOW AT EXHIBITION

New Brunswick Kennel Club and Exhibition Association come to terms—Discuss Dog Law.

The New Brunswick Kennel Club will arrange for the holding of a dog show on the exhibition grounds during exhibition week this year. This was decided at a meeting of the club last evening, after hearing the report of the committee appointed to confer with the executive of the Exhibition Association regarding the proposition to put on a dog show. The club agreed to the conditions proposed by the Exhibition Association and will have a dog show on the exhibition grounds, but it will be controlled by the N. B. Kennel Club.

The question of trying to secure some modification of the city by-law respecting dogs was brought up at the meeting, and some objection was raised to the regulation forbidding any person to allow a dog to appear on the street unless attached to a leash. Members of the club expressed approval of the general principles of the law governing dogs, but thought there should be a modification of the leash law. It was said that there were some kinds of dogs which might be permitted to follow their owners on the streets without being held in leash.

Another matter brought up was that of impounding dogs. Some members thought the dog catcher might be putting all dogs captured on the street in one stall, but admitted that they did not know whether this was the practice or not. They said, however, that it would be better to put all dogs captured by the city in one stall, as there might be fights, and a valuable dog might be injured by a mongrel.

All those who discussed this matter said the city should arrange to place captured dogs in separate stalls. The president was authorized to appoint a committee to interview the commissioner of public works, and discuss with him the possibility of modifying the dog laws, and at the same time make it clear to the commissioner that the club was in favor of the general principles of the dog law.

J. V. McLellan, president of the club, presided at the meeting, and there was a good attendance of members.

CLOSING OF THE SCHOOL FOR THE DEAF

Those present greatly pleased with exercises—Institution doing excellent work, is opinion.

The closing exercises of the New Brunswick School for the Deaf took place yesterday afternoon in the school building, Lancaster Heights, commencing at 2:30 o'clock. There was a very large attendance of the general public, among them were the directors, also Judge Robert J. Ritchie, Postmaster Edward Sears and R. B. Emerson, the chairman of the St. John Board of School Trustees.

The programme was under the direction of Joseph Keating, the principal of the school, and it was mostly an exposition of the various subjects in which the students are taught. All the scholars taking part in the exercises showed marked efficiency in all the lines. The guests present were well pleased and very enthusiastic in their praise of the excellent work that had been accomplished by the teachers of the school.

The institution being a provincial one is undoubtedly most deserving of the support of the general public as it is doing a work that is greatly needed, viz.: the education of an afflicted section of the community which, if left in a state of ignorance, would prove rather serious burdens to the province.

It was the general opinion of those present at the exercises yesterday that the board of directors and the staff of the school were deserving of great praise from the public on the admirable manner in which the institution is carried on.

During the term just closing there has been thirty-five students in the school, viz.: seventeen boys and eighteen girls. The school will close on September 21st and the scholars will depart for their homes this evening.

For the generation of electric current and the city conducts its own lighting system at a great saving.

In connection with the establishment of an incinerator in St. John the city council has authority to contract for the collection of garbage and ashes, and it is probable that a system of this kind will also be started.

In other cities the city cares for all garbage, Toronto, for instance, in particular collections of garbage and ashes are made daily in the more central districts, and in the outlying sections at least twice a week. There citizens have proper receptacles and on the days set apart for the collection the receptacles must be placed at the edge of the sidewalk where they may be emptied directly into the carts of the collectors. It has been pointed out that the expense would be considerable, but that the erection of an incinerator and the adoption of a garbage collection plan would add materially to the public health and be a great saving in the end.

WILL WORK FOR A PROVINCIAL PRISON FARM

Community Council Appoints Committee to Take Up Matter.

MOVEMENT TO KEEP PLAYGROUNDS OPEN

Motion for stricter censorship of moving pictures lost—Will discuss housing problem.

The question of providing for the establishment of a prison farm was the principal subject discussed at the meeting of the executive of the community council held in the Board of Trade rooms last evening, with A. M. Belding in the chair.

A good deal of information was presented regarding the development of the prison farm idea in Ontario and in the United States. J. King Kelly, who has been an advocate of the prison farm project for some years, and who was invited to address the executive, gave an interesting account of the history of the prison farm movement here. He said he believed a portion of the Municipal House property could be utilized, if the City and County of St. John wanted to establish an industrial farm to take care of its own delinquents.

He favored, however, the idea of having a prison farm for the whole province.

The Community Council appointed a committee, consisting of Mrs. R. S. Fiske, A. H. Wetmore, W. F. Hatheway, J. L. Surue and J. King Kelly to investigate the feasibility of establishing a prison farm, either by the province or by the city and county of St. John, and to make a report at the August meeting.

Playgrounds.

The committee appointed to deal with the matter of keeping the playgrounds open between 7 and 8.30 in the evening under proper supervision, reported that they had interviewed representatives of various churches, and that they had no doubt arrangements would be made to keep the playgrounds open in the evening and provide proper supervision.

Moving Pictures.

The question of moving pictures was brought up. The opinion was expressed by a few members that the pictures shown in St. John were not censored as rigidly as they should be.

The chairman pointed out that the superintendent of the School Board and two other prominent citizens censored all moving pictures shown here and that it would be unwise for the city and county of St. John to take on the purpose of the Community Council to antagonize anybody, but to develop a community spirit, and if possible enlist the co-operation of the sporting picture people, as well as others in the promotion of community welfare.

No action was taken in this matter.

At the meeting of the Community Council in July the housing problem will be discussed.

NEW BRUNSWICK GETS MUCH PUBLICITY IN OLD COUNTRY PAPERS

Mr. Bowder says it is much easier to induce people to come to province.

A. Bowder, New Brunswick's representative to Great Britain, who came here a few weeks ago with a party of immigrants, left for Montreal yesterday and will call that port in the Old Country. While here Mr. Bowder had a conference with Hon. J. A. Murray, Minister of Agriculture, and James Gilchrist, provincial superintendent of immigration, and discussed with them various plans for the ensuing year with respect to immigration.

With an improvement in general business conditions in Canada, Mr. Bowder looks for a considerable increase in the immigration to New Brunswick. A good deal of publicity has been given by British journals to the resources and possibilities of New Brunswick, and Mr. Bowder finds that it is much easier to get immigrants to come to the province now than when he was first sent to Great Britain by the Hazen government.

TRINITY PICNIC

At Westfield Beach Saturday, June 27th. Special trains leave at 9.15 a.m. and 1.30 p.m. local time. Meals furnished. 25 cents each; refreshments. Tickets 45c; children's 25c.

FORTUNE FAVORS EUREKA

Apart from its invariably high dividend record the Eureka Fox Co. has plenty of other companies in the fact that all its young stock are early born (born in March) which almost assures them of being breeders in the coming season. This company has capitalized its pedigree breeders very low, in an effort to maintain its annual record of over one hundred per cent in dividends. For information in reference to Eureka, address J. S. Currie, Box 59, St. John, N. B.

IMPROVEMENTS TO STREETS IN THE NORTH END

Workmen busy in Main and Portland streets — New Water Service pipes to houses.

Workmen have been engaged for several weeks in repairing the roadway in Main street from Portland street to Douglas avenue. The old wooden paving blocks have been removed and the space filled in with broken stone, and on this has been laid a covering of crushed stone and asphalt. The work has been going ahead only on the southern side of the street, but so far good progress has been made, and the roadway completed presents a smooth surface.

It is expected that the roadway when completed will last for three years at least, and in that time it is expected a permanent pavement will be placed in the northern portion of the street.

The section of Main street between Paradise Row and Portland is in the hands of workmen from the water and sewerage department who are replacing the service pipes to the different houses. In many cases the old pipe has been in use for thirty years, and it was small when first put in position. The new service pipes will be five-eighths of an inch in diameter and will greatly increase the water supply to some of the houses. It is likely that this work will be completed within the next two weeks and then the contractors for the permanent pavement for this street from Paradise Row to Acadia street will likely start on the improvements for which they have the contract.

HORSE KILLED, DRIVER HAD A CLOSE SHAVE

Boom of derrick fell striking animal across the back — Workmen jump for lives.

Yesterday afternoon a horse owned by a farmer named McCormick was killed and the driver had a narrow escape from death while at work near the Falls, where the contractors are building the new bridge. The horse and cart was standing under a large derrick used for hoisting material from an excavation when some of the gear broke and the heavy derrick boom fell. The boom narrowly escaped falling on the workmen standing near, and they only saved their lives by jumping clear. The horse was not so fortunate as the boom fell on the animal and killed it.

The accident caused considerable excitement for a short time. Last night the dead horse was placed on a sledge and carted to the bone yard in East St. John.

PERSONAL.

C. T. McCutcheon and wife, of Port of Spain, Trinidad, in visiting Mr. C. C. Cuthbert's sister, Mrs. James Donnell, Leinster street.

Lewis Connor of Black's Harbor, is at the Dufferin.

Wm. A. Found, superintendent of fisheries for the Dominion, was at the Royal yesterday.

Wm. McLean, school inspector, arrived in the city yesterday afternoon on the steamer Calvin Austin after a tour of inspection to Deer Island and other schools down the bay.

MIDSUMMER SALE OF MILLINERY AT M. A. A'S

A new hat is always acceptable to Millady, and this sale will provide an opportunity to provide a new one for the holiday and then to wear for the rest of the summer. There will be ready trimmed hats offering a great range of choice in fashionable models, but if you may select from a large assortment of shapes in all the favorite colors for this season and at the same time choose the flowers you would like to use. This will be an unprecedented offering of trimmed and untrimmed hats and flowers at such a money saving that almost everybody will want to take advantage of it.
