# MASSEY-HARRIS HAYING MACHINERY

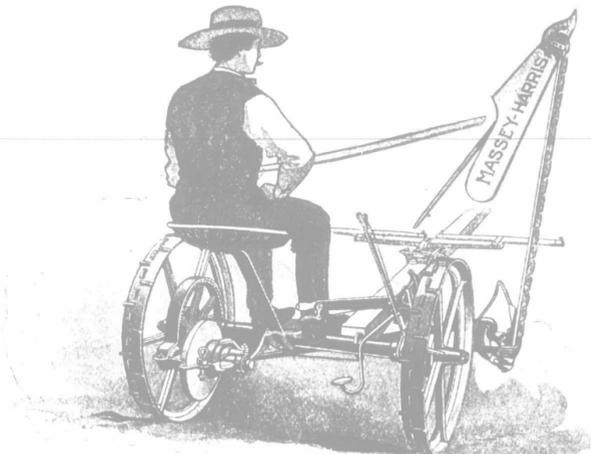

PLEASES EVERYONE

A particular feature of the Massey-Harris Coupling Bar is that it is adjustable at both ends. : : :

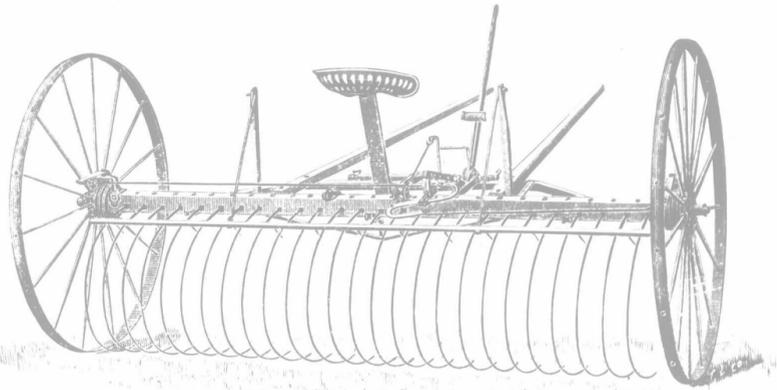

The Knives go out of Gear when the outer Shoe is raised 3 feet, but not till then. : : :

Our splendid line of Hay Rakes is unrivalled. : : :

They suit all kinds of land. : : :

There are Roller Bearings wherever they can be utilized to advantage.

The Frame may be at an angle of 40 degrees, but the Bar still adapts itself to the necessity. : : :

The Cutter-bar can be tilted to any angle desired. : : :

Made in sizes from 8 feet to 10 feet; furnished with wood or steel wheels. : : :

Also All-steel Rakes. 9 feet 6 inches to 12 feet from hub to hub. Either hand or hub dump. : : :
