Josiah and the Book of Law-2 Chron. 34: 14-28

Commentary-I. The Book of the Law discovered (vs. 14-18). 14. Brought out the money—It would seem that the book of the law was found by the high priest in the treasury where the money was kept. Found—This expression indicates that the allusion is to something already known, not to anything that had to light for the first time -Keil, book of the law—The name given to the five books of Moses.—Todd. The book of the law cannot mean anything else,

Shaphan delivered the new found book to the king he reported to him concerning the business on which he had been at at first. He told the king that they had faithfully performed the work committed to them, and that the money had been properly paid out. 18. A book — Shaphan had already read the book, or portions of it (Kings xxii. 8), and no doubt fully understood its character, but he did not tell the king that it was the book of the law; he spoke of it as a book and allowed the king to form his own opinion as to its importance. Read therein (R. V.)—That is Shaphan read portions of the book. "Of course he read at the king's command.

"The effect on the king was like that produced on Luther by his finding an old Latin Lible in the library of the Augustine convent at Erfurt. The reformer had never seen the Scriptures, though he was not only a Christian, but a monk. There window and ask: had been religion enough, of a kind, around him all his life—religion profes-sing to be based on the living word; but. the difference between the conventional and the true flashed on his soul with lightning brightness when the sacred book itself was consulted."

25. Have forsaken me—"This was the gist of their offence, the thing that was unpardonable. Against this were all the chief warnings in the law and the prophets. It was not merely that they broke the comman linents, but they turned from God altogether, and "cast Him behind their back." Shall not be quenched their back." Shall not be quenched— 'Here lies the whole point of the answer. God's threatenings against nations are for the most part conditional, and may escaped, or at least their fulfilment be deferred indefinitely by repentas we learn by the example was equally sure the pain was there and be each by the example of Market by the evell. #### MANITOBA WHEAT.

GREAT EXCITEMENT CAUSED ON WINNIPEG EXCHANGE.

Wninipeg, July 31.—The corner in July wheat caused great excitement on the Exchange here this morning, the price at one time touching nineteen cents above yesterday's close and clos ing at \$1.30, an advance, of fourteen cents. It is believed the Ogilvies and the Van Dusen Harrington company are the mainsprings of the movement which has placed wheat 20 to 25 cents above the export price. The corner has resulted in Robert Muir & Co issuing an injunction against the Clearing House Association to prevent them paying out money or buying grain.
The corner as it now stands is a pure gamble, and of no henefit to the country as a whole, as the number of the farmers who have wheat to sell to wards the end of July is always small The result of the injunction will be awaited with great interest as the rules of the exchange endeavor to prohibit the forcing up of wheat prices be-yond the point at which there is a mar-ket for it. The adoption of Chicago tactics on the Winnipeg Exchange is not looked upon with favor.

AUTHORITIES ARE ALIVE TO YEL LOW FEVER MENACE.

New Orleans, July 31 .- The health au thorities who are handling the yellow fever situation here have now so thor oughly perfected the re-organization that they feel confident every case of fever, even though not thoroughly developed, will be promptly reported and go upon the official records. It is believed that every existing case has been routed out and is now included in the 206 cases which have been announced. Many of these are on the road to recovery and it is recorded that with the purfect seins. these are on the road to recovery and it is expected that with the perfect scientific treatment that has been arranged for, there will be a reduction in the mortality rate, which in the early stages of the disease had been admittedly high.
