

## 20 to 30% Less Coal

ON account of its distinctive construction the Kelsey Warm Air Generator saves 20 to 30% of coal bills.

A Kelsey has 61 square feet of radiating surface to 1 square foot of grate.

This large radiating surface is provided for in a battery of heavy, cast iron, Zig-Zag tubes that surround the fire grate.

These heavy tubes store up heat and radiate it evenly.

All the heat from the coal is concentrated in these Zig-Zag tubes which are right up against the fire. And because of their immense weight they retain the heat for hours after the fire gets low, making constant "firing up" unnecessary.

That is why the Kelsey is the

most economical of all heating systems. It saves from 20 to 30% of coal bills.

Our booklet "Achievements in Modern Heating and Ventilation," tells all about this economical heating system. Send for it.
