

## For All Kinds OF Seeding

No machines or implements are quite so effective as The McCormick Line of Seeding Machines.

The line embraces Hoe Drills, Shoe Drills, Disk Drills and Broadcast Seeders.

All are equipped with a positive double run force feed which insures perfect and even seeding, even if the grain is not perfectly cleaned.

Hoe Drills may be quickly changed to broadcast seeders. Hoes change from straight to zigzag line by convenient lever.

Safety springs on each hoe draw-bar prevents breakage in passing over roots, hidden stones, etc.

Powerful lifting spring aids the lever in easily lifting the hoes. Made in three sizes having 10, 11 and 13 hoes.

Shoe Drills—specially adapted to sandy or loamy soils. Driven from both wheels, insuring even flow of seed at all times. Provided with divided lift—user can lift half the shoes with each lever.

Perfect regulation of pressure on shoes.

The McCormick line of tillage implements for Canada is complete and includes Smoothing harrows, spring tooth harrows, disk harrows, scufflers, cultivators and land rollers.

Call on the International Agent for information or write nearest branch house for catalog. CANADIAN BRANCHES: Calgary, London, Montreal, Ottawa, Regina, St. John, Toronto, Winnipeg. INTERNATIONAL HARVESTER COMPANY OF AMERICA, CHICAGO, U. S. A. W. C. (INCORPORATED.)

This drill is made in three sizes: 16, 18 and 20 shoes.

Zigzag Disk Drill specially adapted to drilling stubble or trashy land. Being zigzag, with wide spaces between disks, drill will not choke or clog. Splendid for seeding on fresh breaking or sod plowing. Cuts up the earth, making a fine seed bed.

Made in three sizes: 15, 17 and 19 disks.

Cultivator and Seeder may be quickly changed from one to the other. Sows all kinds of small grain broadcast and covers it with the cultivator. Equipped with grass seed attachment.

Made in two sizes—6-foot with four sections and 7½-foot with five sections.

Broadcast Seeder worked with one horse, fluted force feed and safety spring grain spout. Grass seed attachment. Sows all small grains in any desired quantity. A very strong and efficient machine.

## For Farm Use

A Fairbanks-Morse 2 H. P.  
Jack-of-all-Trades  
GASOLINE ENGINE

will saw wood as fast as two men can handle it. It also pumps water, shells corn, grinds feed, makes butter, runs cream separator, in fact furnishes power for all farm purposes. Every farmer should have one.

Cut out this complete advertisement and send it to

The Canadian Fairbanks Company, Ltd., 92-94 Arthur St., Winnipeg, Man.

Please send me (without charge) particulars about Jack-of-all-Trades Engine for farm use, Catalog E. 102.

I may want a..... H. P. Name .....

Engine for ..... Address ..... Prov. ....

## Questions and Answers. SLUGGISH CIRCULATION, ETC.

Gelding 11 years old seems always in more or less trouble with his water but generally works well. Swells up and then large swelling forms on belly continuing from front of sheath to near fore legs. These swellings on sheath and belly feel like putty when pressed and retain the mark of fingers for some minutes. Indisposition to lie down or move about. No affection of legs except slight stiffness and general weakness. Loss of flesh rapid, appetite as good as when in health. Always kept sheath clean and when notice trouble with water have given saltpetre (1 oz. dose) in feed once a day for three days. Latterly have given 3 oz. nitre once or twice at intervals. Horse has done no extra hard work and has always had good care and attention. Usual feed one gallon oat chop and bran mixed three times a day. We have had no veterinary in this district most of winter and it would take half the value of the horse as he now is to get one here.

Sask. T. S. G.  
Ans.—Give physic of aloes or one and a half pints of raw linseed oil, follow with powders made as follows: sulphate of iron 2 ounces, pulverized nux vomica 2 ounces, rad gentian pulverized 8 ounces, nitrate of potash 3 ounces. Make 16 powders, give one every night in the feed. Send \$1.10 to this office for a copy of Veterinary Elements and read it carefully.

## SWELLED LEG FROM KICKING.

Have got a mare eight years old in foal, has right hind leg swollen at the hock, caused by kicking side of stall. I left her under the care of a V. S., see no improvement so ask your advice as to proper treatment of leg. She is not lame.

Alta. A. H.  
Ans.—Get some mild liniment from the druggist and follow directions; some such as are advertised in these columns. Feed mare moderately well, and give regular exercise of light work. Confine in a box stall until foal has arrived. If forced to keep in a single stall, make straw bales and hang on stall posts so that injury cannot be done to the leg.

## ABSCESS FORMATION.

Young cow has a lump about the size of a small bowl on her side, up on the ribs, have clipped the hair off and applied iodine but it has not left, but now seems soft and spongy. Would it be advisable to have it lanced?

Ans.—Yes. SUBSCRIBER.

## GRASSES FOR PASTURE.

Which makes the better permanent pasture the native prairie grass or cultivated grass? What variety of grass would you advise sowing? How much cultivation would the land require before seeding down if taken out of the prairie sod? Will same grass grow on alkali ground?

Man. PASTURAGE.  
Ans.—1. Tame grasses will if properly handled.

2. It is largely a matter of individual preference, we believe the only place for Brome is in the permanent pasture. Many prefer timothy or native rye grass, why not try some alfalfa?

3. Take three crops of wheat, and seed down with grain. Would not advise permanent pasture on Manitoba farm unless the land to be used is unsuitable for other purposes. Manure and drain the alkali land.

## TRAIL TO NEW DISTRICT.

Two different parties ask for the best way to get to 32, 22, 5, W3rd and the nearest post office.

Ans.—We are not aware of the name of the post office nearest this particular location but it is reached from Craik on the Prince Albert branch by trail. We could not say what the trail is like from Moose Jaw north but would suppose it is quite passable.

## BRANDING CATTLE.

What is the best method used in branding cattle? Is there any liquid used for that purpose, if so what form?

Sask. SUBSCRIBER.  
Ans.—The hot iron is most generally used; last fall an Australian patent for a gasoline branding iron was shown, but it is not as cheap as the ordinary method. A liquid brand has been devised but as it is not generally used presume it is not a satisfactory method.

## FOREST HOME FARM

CLYDESDALES, SHORTHORNS, YORKSHIRES  
and B. P. ROCKS

A couple of one-year-old Clydesdale stallions—good ones; four yearling bulls and a dozen heifers all sizes. Boars and sows, old and young. Prices of cattle are down, and we will quote accordingly. We need the room, and can use the money. A choice lot of Scotch collie pups, eligible for registration.

ANDREW GRAHAM,  
Carman and Roland Stns. POMEROY P. O.

## Woodmere Stock Farm Neepawa, Man.

Always a good supply of both sexes for sale. Not related.

PLYMOUTH ROCKS A SPECIALTY

## STEPHEN BENSON

## SUNNY SLOPE SHORTHORNS

I have now for sale one 2 year-old red bull (imp.) and six extra well-bred yearling bulls and several cows and heifers. Prices reasonable and quality right.

JOHN RAMSEY,  
Priddis, Alta.

## YORKSHIRES

We are now booking orders for Spring pigs from such boars as DALMENY TURK 2nd (imp.)—12445—(bred by the Earl of Rosebery, Scotland, RICHARD CALMADY (imp.)—13438—(bred by the Nottingham Corporation Farm Committee, Nottingham, England) and WEYANOKE AMBER—17224—(bred by Andrew Graham).

Our advice to purchasers is to buy pigs when they are young. They are cheaper then and the Express charges are light.

WALTER JAMES & SONS,  
Rosser, Man.

## Grandview Herd. SCOTCH SHORTHORNS

Herd headed by Trout Creek Favorite 53595
