Recent Phenomenal Catches Show the Habits of Finny Tribes Are Peculiar.

During the year 1903 there was the largest run of salmon in Irish, English and Scottish waters ever known, and this came right upon a general assumption that the records of preceding years that the fish were gradually diappearing. This shows how little is under-

ing. This shows how little is understood about the ways of fishes.

It is recognized that last year in England was phenomenally rainy. It broke every known record for preceipitation. There is an intimation that superabundance of fresh water may have had its influence in inducing the salmon to go upstream. The Spectra of the salmon to go upstream. the salmon to go upstream. The Spectator says that many salmon stay around in the sea and refrain from going into fresh water. It says, too around in the sea and refrain from going into fresh water. It says, too, that it has been proved by marking the fish that within the space of five weeks the two days a salmon of ten and one-half pounds has been found to grow to twenty and one-quarter pounds. Nothing else grows so fast.

The same journal refers to the story that salmon in our western rivers push each other ashore in their upstream rush, and casts a doubt on this. But perfectly trustworthy persons, of high

erfectly trustworthy persons, of high perfectly trustworthy persons, of high intelligence and universally respected, will vouch for it that they themselves have seen the banks of rivers in Brit-ish Columbia packed with dead salmon which produced such a disagreeable at-mosphere by reason of their disintegra-tion that it was almost unbearable for tion that it was almost unbearable for people who had to pass that way. In the push of fish there is not room for them in narrow parts and they are crowded right up to the banks. There is no doubt of this, and it is among the smaller anecdotes of the kind that one will gather in a trip in that part of the world.

GREAT LAKE OF SIBERIA.

The drowning of several hundred Russian soldiers in Lake Baikal, in Siberia, has been chronicled in the despatches, but the report is declared erroneous. The lake is from 20 to 60 miles wide and 500 to 600 miles long. It lies between 100 and 110 degrees east longitude and 50 to 56 degrees north latitude. Its area equals that of Lake Erie and Ontario combined. Its depth is a mile in places, Lake Superior, the deepest of American lakes, is 1,030 feet deep.

There is a convict route around the

lower portion of the lake, but the grades are so stupendous that the cost of a road over this route has been estimated to be \$250,000 a mile. Roads in the United States average about \$40,000 a mile, under difficulties. The route is 150 miles long. It is evident why the Russian deupon his boats in summer, which make three round trips weekly, and builds his railroad upon the ice in win-ter, when it freezes to a depth of 12

In summer the storms strike Lake In summer the storms strike Lake Baikal out of a clear sky. The wind rushes down from the north like a hurricane, without warning. When it strikes the surrounding hills, which nose out into the lake in rugged precipitous promontories, the hurricane changes to a cyclone, and the surface of the deep sea is twisted into the most appalling shapes. Russian bootmen never attempt to wen-Russian boatmen never attempt to weather Baikal storms if there is any hone of reaching the nearest shore. If the shore be astern sailors turn about and flee. If it be ahead they flee. Baikal terrifies the Russian not only in summer

but in winter.

In winter it is equally dangerous When the air holes close in the ice, as is frequently done, there is an explosion that can be heard for miles. The surface of the ice becomes a volcano and huge mountains of ice shoot upward, fall and disappear in the water, to reappear at another place, crashing through the frozen ice. The closing of an air hole in the ice of Lake Baikal might wreck the Czar's ice raidroad, sinks his cars, and rails, and possibly his soldiers, and completely cut off communication until another route across the lake could be laid out, to meet, perhaps, a similar fate.

The directors of the road have contemportations all over the associations all over the seminate and supportance all overs the fountry have agreed to pass up in the future all forms of advertising except in newspapers or other established publications is most gratifying.

They have been forced to take this action by importunings for assistance to share the expense of innumber to share the expense When the air holes close in the ice, as

out, to meet, perhaps, a similar fate.

The directors of the road have contemplated building around the lower end of the lake, and possibly work already has begun. But it will be two or three years before it is finished, and surely not in before it is finished, and surely not in time to assist in the transporting of troops to met the advance of the Japanese on the Yalu.

One end of the lake traffic is Listve nichnai. The other is Misovaia. The dis tance between them is 53 miles.:

HELD AN EXCELLENT HAND.

Things had progressed to a point where the young man had been practically received into the family circle. While he hadn't yet mustered up sufficient courage to ask the old man's consent, it was evident that he would

Thus it happened that the old man, who liked nothing better than a good game of whist or euchre or hearts, invited him to a little game one evening, and, of course, he didn't feel

evening, and, of course, he didn't feel that it would be policy to refuse.

"You and mother," said the old man, referring to his wife, "can play against Gladys and me. That will be fair. If you and Gladys sat opposite each other you would probably per-

nothing, and the game began. It wasn't much of a game. While the young woman wasn't sitting op-posite the young man, she was sit-ting next to him, and every few min-utes one or the other of them forgot to play when it was his or her turn. Then, too, there were frequent in-quiries as to who took the last trick duries as to who took the last trick and what was trumps, and, altogether, the old man felt a good deal lke swearing on one or two occasions.

Finally he made up his mind that patience had ceased to be a virtue.

The game had come to a standstill income of any two plates.—From the Sciniary of the standstill income and the sciniary of the standstill income any two plates.—From the Sciniary of the standstill income any two plates.—From the Sciniary of the standstill income any two plates.—From the Sciniary of the standstill income any two plates.—From the Sciniary of the standstill income and the standstill inc

Easter.

Bright, bright was the orb that illumin'd the morn
When Christ, our Redeemer, arose
Triumphant o'er death, from where,
tortur'd and torn,
His body was laid in repose.

White-robed were the angels who watched through the gloom, While dark, sable night spread its

pall;
But when, incorrupt, He arose from
the tomb
There flashed a bright halo o'er Then came holy women, ere sunlight

appear'd, To anoint His dear body, alone; No one will be present to open, they fear'il,

The sepulchre sealed with a stone

They found that the task had already been done— The body they looked for in vain— They have ta'en Him away," cried in anguish each one,
"Where shall we our Lord find

again?"
Then heard they an angel who stood by the spot
Where the tody of Jesus had laid,
Say, "He whom you sock has arisen.

Fear not; All now is fulfilled that He said." Quick har tened they back, all their fear thus relieved;
The faithful disciples to seek;
Then Peter and John went, and all

A BEAUTIFUL WOMAN.

A BEAUTIFUL WOMAN.

Among the most beautiful women in London society is the Countess of Airlie, who still retains the loveliness of feature, complexion and expression that made her famous as Lady Mabel Gore. The fact that her hair has now grown white if anything enhances her brilliant Irish beauty and gives the effect of powder. She is a widow, her husband, the earl, having been killed in a cavalry charge in the Boer war. It is—whispered that her widowhood is shortly to be that her widowhood is shortly to be broken. No woman during its continu-ance has been made and refused so many offers. The successful man is said to be an American multimillionaire, who has taken up his residence in England himself a widower, and still young in

When Temperature Was 32 Below. Oscar Wilte, of Le Sueur, Minn., met with a most remarkable accident this morning that very nearly cost him his life. With his rifle in hand he him his life. With his rifle in hand he was attempting to get within range on a cat he desired to shoot, when the animal ran up into the framework supporting the water tank. Standing directly beneath the cat, wilte shot straight up at it, carelessly forgetting the fact that the tank was within range.

The bullet killed the cat and pierced the bottom of the tank, and in an instant the water, gushing out, surrounded Mr. Wilte with a complete shower bath in a temperature of 85 degrees below zero.

degrees below zero.

Instantly his overshoes froze to the stone foundation on which he was standing, and, stooping to unbuckle them, he was chained by the spray,

freezing in the ferrible cold as fast as it fell into a helpless statue of ice stiff and immovable as a stone. Only by his stooping posture, which kep his face free from the ice, was he asked from sufficient ice. saved from suffocation,
Soon the flow of the water was
stopped by the sediment in the tank
flowing into the bullet hole, and a
little son of Mr. Wilte, who had seen
the whole affair, ran for assistance. It was necessary to loosen the un-fortunate man's feet with chisels, and when he had been carried into

when he had been carried into the house by three strong men, the ice had to be broken from him with clubs. He was badly frightened by the experience, but otherwise unharmed. The body of the cat was found frozen to his back.—Pioneer-Press. Wash greasy dishes, pots or pans with Lever's Dry Soap a powder. It will remove the grease with the greatest ease. 36

UNFAMILIAR FACTS.

In all countries more marriages take place in June than in any other month. Spain has an average of 3,000 hours of sunshine a year, against only 1,400 in England. Owing to the clearness of the air con-

versation in the Arctic regions can be carried on by persons two miles apart.

How to Treat a Cat.

We are sorry to see many specta-tors at the Cat Show themselves so tors at the Cat Show themselves so lamentably ignorant of the feline nature as the following news item would indicate. "The incessant poking of fingers into the cages by enthusiartic spectators has rendered many of the cats very irritable, and one man admitted that his effective become familiar with one forts to become familiar with on of these animals had resulted in a deep scratch to his hand." A cat chooses her own time to be stroked chooses her own time to be stroked and "poked at." Montaigne, who was a shrewd observer of time cat, as he was of everything else, wrote regarding his own pet: "When I play with my cat, who knows whe ther size diverts herself with me, or I with her? We entertain one anwith mutual follies, strug gling for a garter; and, if I have my time to begin or to refuse, she also has hers. It is because I do not understand her language that not understand her language that we agree no better; and perhaps she laughs at my simplicy in mak-ing sport to amuse her." An essen-tial difference between the cat and dog nature is also described by Chateaubriand, who says: "When we caress a cat she stretches herself Chateaubriand, who says: "when we caress a cat she stretches herself and arches her back responsively; but that is because she feels an agreeable sensation, not because she takes a silty satisfaction, like the dog, in faithfully loving a thankless master."—N. Y. Com. Adv.

THE VALUE OF ADVERTISING.

"Robert Bonner," said a writer of advertisements, "was the biggest advertiser of his day. I was once talking to him about advertising, and a remark he made still lingers in my memory. "To try to attract the public with-

out advertising,' Mr. Bonner said, 'is like trying to flirt with a girl in the dark. Wink and smirk at her as much as you please—you yourself know what you are up to, but she—your public— has no inkling." THE CHEERFUL IRISH.

During his recent stay in this country Michael Davitt told many stories to il-lustrate the cheerfulness of Irish charlustrate the cheerfulness of Irish character. "No man's condition," he said, "is so wretched bit he will crack a joke about it." By way of illustrating this he told of a poor peat cutter whom the parish priest invited to dinner one day. "It isn't much of a dinner, Pat," said he, "only beef, potatoes and beer, but you are very welcome." "Sure, your reverence," said the peat cutter, with twinkling eye, "tis a good dinner enough—the same as I'd be getting at home, barring the beef and the beer,"
