Barrett-Lennard passed away quite suddenly last Wednesday morning, after an illness of only three days duration. She was buried on the homestead on Thursday. The child was taken sick while visiting at W. C. Dunn's on Sunday morning, and on Tuesday was apparently so much better that she was removed to her home, where she was enjoying the slight ride so much that it was planned to take her out again the next day. But the following forenoon she passed quietly away while the family supposed she was only sleeping. The bereaved ones have the heartfelt sympathy of the community.

VERMILION. (Bulletin News Service.) St. Patrick's day, on the evening of which the ladies of the Presbyterian church gave an Irish dinner, will long be green in the memory of those who partook of the viands of the most toothsome and varied kinds, for which the Presbyterian ladies have a record. The tables were tastefully decorated with shamrocks and Irish flags.

Diagonally across from the site of the new post office on another lot owned by Dr. Archibald, he contemplates the erection of a stone store and office building. It will have a frontage of 66 feet on Whyte avenue and will have four stores facing on that street. This corner, as the result of the construction of either of the proposed civic high level bridges, will be one of the most central in the city and the inevitable trend of business will be towards the western part of Whyte avenue.

To the east of the office of J. G. Trip-ton & Son in the same block A. M. Richards & Co. are contemplating the erection of a large store and office building. This has been under consideration for some time but no definite conclusion has yet been reached. It is likely that work will shortly be started upon the erection of the new city hall at the northeast corner of Main street and First avenue north and the work on the new municipal hospital will according to present arrangements be begun in a few weeks.

The continuation of the erection of the Holy Trinity church is making progress and it will be rushed to completion as rapidly as possible. The excavation for the new University of Alberta buildings will be begun in a week or two and the foundations will soon be laid. The above are a few of the important works that are contemplated for 1938. There is no doubt that the season will be an excellent one from the standpoint of the building trades.
