The Nissouri Nudger

Vol. 1, No. 1.

EVELYN, ONTARIO, JULY 19, 1910.

50c Yearly in Advance

OPENING ODE.

A taxpayer in London wants the band concert music muzzled from the children-wants to keep the kiddies in the background. No won-der London doesn't boost with such selflsh souls owning property in four wards. Better send the publicity agent after all such narrow mugs and if possible convert them. Then perhaps the place may thrive

For many a year the official scalp of the City Engineer of London has been chased after. Many have been the hunters. And now that the owner of it brings it in and meekly lays it at the feet of his pursuers they look at one another dazed like. One er more of them choke with sobs and shed real tears of regret. If they could they would let him go right on wearing his scalp. Even those who wanted it most didn't want to However, after handing take it. Bob all the newest kinds of chocolates they pit h him over. And now that they have the thing they sought they scarcely know what to do with into print, excepting perhaps that of Perhaps they'll go further and it. fare worse. Such things have been done in Lordon before.

The Hon. Adam Beck, M.L.A, former mayor of London three times, hospital trustee, water commissioner, purveyor of well water to the citizens of London, Niagara power potentate, consumptive hospital promoter, etc., etc., etc., etc., appears to be able to do what he likes with the people of London. We believe he might yet be competant to make a farm pay in Iceland But he'd have to go some. Farm ing anywhere is not an easy job.

Trusses, Etc.

In a Drug Store will be found many things that do not come under the head of Medicines. Our line of

Trusses, Crutches, Shoulder Braces, Abdominal Belts, Silk Elastic Stockings, Knee Caps, Anklets, Rubber Coods such as Fountain Syringes, Water Bottles, Atomizers, etc., form an important part

A caller at the Nuce on will con-was the vener ble Sidney Bearnt will conwas the vener able Sidney Beaffit will con-turer of underground watercours is true, intimated that the factory would scienting be able to supply the demand this seasoff, which one could readily believe judging from the amount of clay be carries on his boots, which naturally suggested a short-age of material at the factory. He dis-played or gradity a highly colored ontic age of material at the factory. He dis-played proudly a highly colored ontic, tinted in greenish blue by th t rising young artist, Verne Pardv. Sid says he is going to wear it day and night until it wears off.

Every village nowadays has its local paper, and why not? In some of the new towns of the West where only the stakes for a future thriving city can be seen, the printing plant is first on the ground and begins to boom the place. This being so, why cannot the prosperous, fruitful, well settled and progressive Township of Nissouri have a paper that it can call its very own? So argued the publisher of the Nudger when he was planning the thing. And here it is.

Nissouri is close to the big and ever growing city of London---our township's market town---a city we are all more or less proud of because Parcel and Check Room. we have helped to build it. The city has two progressive papers which circulate freely in and through western Ontario. While these bring the news of the world to us, very little of the local news in which our people are most interested ever gets which we have no reason to be proud. Therefore the Nudger will not take the place of the city dailies nor will they fit the niche the Nudger is about to step into.

We propose to take up, discuss and promote all matters of interest to the township, the county, the city, the province, the dominion and the empire. In so doing it may at times be necessary to tread on the tails of somebody's coat occasionally, but it is not the intention of the Nudger to wilfully hurt the feelings of anyone. We propose to talk plainly on all public questions, especially those in which the township is interested.

Our intention is to give the sturdy farmers of Nissouri a clean, honest paper, not only as regards the reading matter, but its advertising columns will be strongly guarded as The vile and pernicious adwell. vertising, which seems to be a feature of the larger papers of the day, will not be published at any price Only advertisements of first-class, reputable concerns will be published and realers of the Nudger need have no lesitation in giving them their patronage.

th Mistakes happen in the best regued domestic circles, but we trus
