FORCIBLE POINTERS

Whatever crop you grow, success or failure is largely governed by the seed used. **Successful growers always use the best seeds obtainable.** All seeds have a value, which varies according to the care and selection of stock in producing them; indifferently grown seeds cost less to produce and permit of being sold at like low, "cheap" prices—**Like produces like.** The labor necessary to grow a crop with "cheap" seed is the same as when using the best seed—**then why incur unnecessary risk by using "cheap" seeds?**
