# CONSUMPTION

## WHAT IS CATARRH?

Catarrh is a muco-purulent discharge caused by the presence and development of the vegetable parasite amouba in the internal lining membrane of the nose. This parasite as only developed under favourable circumstances, and these are:—Morbid state of the blood, as the blighted corpusele of tubercle, the germ poison of syphilis, mercury, toxomeca, from the retention of the effect matter of the first suppressed perspiration, badly w. "iii-'ed sleeping apartipests, and other poisons that are germinated in the blood." These poisons sheep the internal lining membrane of the nose in a constant state of irritation, ever ready for the deposit of the seeds of these germs, which spread up the nostrils and down the fauces, or back of the broat, causing ulceration of the throat: up the custachnar tubes, ausung deafness; burrowing in the vocal cords, causing hoarseness; usurping the proper structure of the broatchnat tubes, ending in pulmonary co-sumption and death. Many attempts have been made to discover a cure for this distressing disease by the use of inhalents and other ingenious devices, burrone of these treatments can do a particle of good until the parasites are either destroyed or removed from the mucous tissue. Some time since a well-known physician of forty years standing, after much experimenting, succeeded in discovering the necessary com anation of ingredients which never fail in absolutely and permanently era-dicating this horrible disease, whether standing for our year or forty years. Those who may be suffering room the above disease, should, without delay, communicate with the business managers—Toronto Mani. Missies. A. H. DINON & SON 305 King St. West, Toronto, Carada. Inclose stamp for their treatise on Catarrh.
