GEORGE DARTNELL.

Lumber.

Watte Pixe. - The supply of this article, so is, falls short of the expectations formed during by his short of the season. The quantity mea-ter the part of the season. The quantity mea-ted to date is 11,173,771 feet against 11,387, 20121 year, and 22,345,355 feet the year be-tie. The large amount of tonnage loaded at as port has of necessity prevented the accumuis por his of necessing present and accumulation of stock, and the stock on hand is musually light for the season. A mft of fair Tipuber of feet average, was sold early in the week at and was re-sold shies at \$1d, which does not blicate a falling market, and the majority of slicate a falling market, and the majority of the in the trade speak confidently of an adapt.—We learn from the very best sources of commation that even at present, pices, which is must call high, this article cannot be product if the rites now prevailing for wages and other necessary expenses of manufacture remains the figures which must be looked for so long with existing prosperous state of this country at of its trade generally continues. Some lots 50 70 feet average, fair Timber were placed at 150 81d, and a small sized raft, good quality, their average, (Supple's) was sold yesterday 171d. A lot 72 feet, Bay of Quinte Timber, 70 to 75 feet, of which there are a few rafts market, is held at 81d to 81d. In shipping the we have heard of some transactions at 9d at 75 feet, and 91d for 75 feet and over.

k 73 feet, and 91d for 75 feet and over.
Rio Bisk.—There is more disinclination to
reate both by sellers and bnyers of this artik, than of any other description of wood. The spage of a large quantity of the expected supspage of a farge quantity of the expected supn, through want of water in the government

great as the value of the article. The holder of

rer superior lot 40 feet average, at Indian

ret, has refused 15 01d, and asks 12 2d, but Bytown

this price is we think above the market value. We suppose is per foot for 40 feet average is the we suppose is per toot for 40-tect wenges is the outside quotation, though a lot of 87 feet (Supple's) was sold at 11d and was re-sold again at 11d, but one would suppose that the seller had the best of the transaction. The quantity measured this year is 2,156,056 feet against 786,101

feet has year.

OAK.—Continues firm at last week's prices, 2s dd, per foot, being obtainable for it by the dram. The check given to ship hulding may effect the price of this article.

ELM.—Scarce, and large sizes almost unob-tainable. We expect 40 feet average or shipping order cannot be purchased under 2s, 33 feet in the raft, with some White Pure, was sold at 1s

TAMARAC.-We cannot advise any improvement on our previous had report of this article, there being no demand whatever except for picked sizes, to suit purchasers for ship building, but the demand even for these are limited on account of the smaliness of the operations of our builders, both at present and in expectation during the ensuing winter. The quantity measured reaches nearly 24 million feet—four times as much as last year.

Drais.—"Floated Pine" are more plenty but have not gir... way in price, £16 to £16 53,4740 thirds and £8 being still paid for them. "Bright," scarce and saleable at £17 to £17 55, two thirds, and £8 103, loing asked and paid. "Spruce," no decline on our previous high quotations, £9, £8 and £7, for firsts, seconds, and thirds.

Staves.—Maintain the advanced quotation in our last, £57 103, per mille, (and £60 for pipes,) being paid for staydard, merchantable, and for W. O., W. I. merchantable £18, has been paid. We have not keard of any transaction in Culls, but we believe rates remain the sume as hist week.

Latuwoon.—Saleable at previous rates. £58 DRALS .- "Floated Pine" are more plenty but

LATHWOOD.—Saleable at previous rates. 45s to 50s per cord.

Do. Spruce £9 for late for 2nds. £8 for 2nds. £7 for 3nds. N. R.—Farties in England will bear in mind that timber sold in the Haft subjects the purchaser to great expense in dressing, butting, and at times heavy loss for cults—if sold in hipping order, the expense of shipping only to be added.

TIEMADES. WHERE PINE continues to arrive very slowly, and rafts find purchasers on arrival especially if good quality and average. The latest sales have been 94 for 85 feet measured off, and 8d for 58, and for a fair lot of 47 feet 04 has been re-fused. The advices from England are far from encouraging, in fact, show great depression in the markets there, but have little effect on prices here, the tennage now loading being heavy and stocks light.

"Red Pine is still very inert and except a few

RED PINE is still very inert and except a lew sales of 34 a 35 feet at 10d a 10d, and occasionally one of 40 feet at 1s. there is little doing.

A great deal that was expected will be left above till next seison, owing to the lowness of the waters, and consequently the stock for sale is by no means excessive. Prices in England is by no means excessive. Prices in England are, however, very low and tell on Red much more than on White Pine. Eth is very scarce and sells readily on arrival

if of fair average.

Our continues firm at our quotations as well as Staves, while Tamaruc and Pino remain much the same as when we last issued our Circular. Spruco Deals though greatly depressed in the English market are excessively scarce here and

our quotations are fully realized.
PRESSURES—40s to Liverpool 41s a 42s to Clyde and £5 15s for Deals to London.

FORSYTH & BELL.

SHAVING & HAIR-DRESSING.

THE Subscriber would take this opportunity of returning thanks to the public for the liberal patronage extended to his late Father; and at the same time would respectfully inform the Citizens of Bytown, and trarellers visiting the citizens of bytown, and travelers visiting this place, that he will continue the business in all its branches, at the OLD STAND, Rideau Street, Lower Bytown, where he will, at all times, be happ, to see all the old customers.

137 Open every Saturday night till 120 clock, and no shaving on Sunday,

GEORGE N. GREEN.

Bytown, August 1854.
