## Scientific and Sanitary.

Serum for the treatment of diphtheria has been obtained so far in France from old hack horses. The French government now proposes to give the Pasteur Institute the first choice in the selection of horses condemned as no longer fit for the French cavalry service. It takes from six to eighteen months to prepare a horse to furnish the serum used in the latest cure for diphtheria.

A London firm engaged in the transportation of Jews from Russia to American countries has made a report that between January and October of this year the number transported was nearly a quarter of a million, the majority of whom obtained pecuniary assistance from funds raised in their behalf. The country which most of them favoured was the United States.—*New York Sun*.

The shark, much as the sailors may hate it, furnishes many valuable products. An oil obtained from its liver vies in medicinal qualities with that obtained from the liver of the cod; its skin, when dried, takes the hardness and polish of mother of pearl, and is used by jewelers for fancy objects, by binders for making shagreen, and by cabinet-maker for polishing wood; while the Chinese pickle its fins and think them one of the greatest delicacies beneath the sun.

A French watchmaker, living in Geneva, Switzerland, has invented a watch which speaks, instead of striking, the hours and quarters. It is provided with a tiny phonograph. The engraved lines which actuate the needle and make the instrument say "It is 1 o'clock," "It is a quarter past 1," and so on, are arranged in circles, one inside of another, on a flat disk, and the works shift the needle from one line to the next, and rotate the disk once for each quarter of an hour.

If a can of milk is placed near an open vessel containing turpentine, the smell of turpentine is soon communicated to the milk. The same result occurs as regards tobacco, paraffin, assafoetida, camphor and many other strong smelling substances. Milk should also be kept at a distance from every volatile substance, and milk which has stood in sick chambers should never be drunk. The power of milk to disguise the taste of drugs—as potassium iodide, opium, salicylate, etc.—is well known.

We hear that a new material, composed of coir fiber, which is obtained from the husk of the coconut mixed with bitumen, is about to be introduced into this country for road paving. When formed into blocks and laid on a road-way it forms a surface which is said to possess all the advantages of wood and asphalt, with none of the objections of those materials. It is wholly impervious to moisture, gives a sure foothold for horses, is very durable, is, moreover, very cheap and the old material can be utilized again and again for making new blocks.

JACKSONVILLE, Fla.,

18th August, 1894.

To whom it may concern—And that is nearly everybody.—This is to certify that I have used Coutts & Sons' "Acetocura" on myself, my family and hundreds of others during the past fifteen years for headache, toothache, rheumatism, sciatica, sprains, cuts, boils, abscesses, scarlet fever, chills and fever, and also with good success on myself (as I was able) in an attack of yellow fever. I can hardly mention all the ills I have known its almost magical power in curing, such as croup, diarrhoea, biliousness, and even those little but sore pests to many people—corns. The trouble is with patients, they are so fond of applying where the pain is—and not where directed, at the nerve affected. And the trouble with the druggists is that they also want to sell "Something just as good," which very often is worse than useless.

Wishing you every success in your new establishment, and that a more enlightened public may appreciate the blessings of your Acetocura, is the fervent wish of

Yours truly,

CAPT. W. M. SOMERVILLE.

Late of U. S. Engineer Service, and formerly of the Marine Department, Canada.

To Coutts & Sons, 72 Victoria St., Toronto.
