

- (iv) if recommended by the Committee, in 1986 and subsequent years adjustments to the ceilings may be made in response to reductions in chinook abundance so that the indicator stocks are rebuilt by 1998; provided that reductions in ceilings for 1986 will not be made unless the Committee recommends a reduction greater than 15 percent, based on reductions in stock abundance for that year;
- (v) fishing regimes are reviewed by the Committee and structured so as not to affect unduly or to concentrate disproportionately on stocks in need of conservation;
- (vi) if catch ceilings are exceeded in any year, the differences shall be addressed by the responsible Party in a manner that will ensure rebuilding of the affected stocks by 1998.
- (e) evaluate all sources of induced fishing mortality, estimate unreported catches of chinook salmon, assess the impact and minimize the effects of these factors in 1985 and 1986. The Commission shall take into account such estimates of total chinook mortality in implementing the chinook rebuilding program.
- (f) manage all salmon fisheries in Alaska, British Columbia, Washington and Oregon, so that the bulk of depressed stocks preserved by the conservation program set out herein principally accrue to the spawning escapement.
- (g) establish at the conclusion of the chinook rebuilding program fishery regimes to maintain the stocks at optimum productivity and provide fair internal allocation determinations. It is recognized that the Parties are to share the benefits of coastwide rebuilding and enhancement, consistent with such internal allocation determinations and this Treaty.
- (h) exchange annual management plans prior to each season.

2. The Parties agree that enhancement efforts designed to increase production of chinook salmon would benefit the rebuilding program. They agree to consider utilizing and redirecting enhancement programs to assist, if needed, in the chinook rebuilding program. They agree that each region's catches will be allowed to increase above established ceilings based on demonstrations to the Commission and assessments by it of the specific contributions of each region's new enhancement activities, provided that the rebuilding schedule is not extended beyond 1998.
