### Key Energy and Environmental Data (1989 data)

|                                                           |                              |
|-----------------------------------------------------------|------------------------------|
| TPES (adjusted):                                          | 204.80 Mtoe                  |
| % Total OECD TPES:                                        | 5.45                         |
| % Total World TPES:                                       | 2.77                         |
| Per capita TPES:                                          | 3.65 toe/person              |
| TPES/GDP ratio:                                           | 0.35 toe/1000 US\$ 1985      |
| Per capita TFC (adjusted):                                | 2.29 toe/person              |
| TFC/GDP ratio:                                            | 0.22 toe/1000 US\$ 1985      |
| Energy related CO <sub>2</sub> emissions per capita:      | 1.89 t carbon/person         |
| Energy related CO <sub>2</sub> emissions per unit of GDP: | 0.18 t carbon/1000 US\$ 1985 |
| % Total energy related OECD CO <sub>2</sub> emissions:    | 3.81                         |
| % Total energy related World CO <sub>2</sub> emissions:   | 1.81                         |
| % Population growth (yearly average growth 1980-1989):    | 0.47                         |
