Elle est digne de la recommandation du Département de l'Éducation. Le mode qui y est suivi pour initier les enfants aux connaissances qu'il leur importe d'avoir sur la géographie est excellent; et à l'avantage d'inculquer dans l'esprit de l'enfant des notions complètes de géographie tout en l'amusant. L'auteur prend on quelque sorte l'enfant par la main: il lui fait parcourir les continents et les mers, l'arrête dans chaque pays, lui fait remonter ou descendre tous les fleuves et les rivières importantes et lui fait faire une promenade dans chacune des principales villes. L'auteur trouve le moyen de captiver d'avantage l'attention fatiguée de son élève par une anecdote amusante et instructive. —*Courrier de St. Hyacinthe.*

We have no hesitation in stating that it is well adapted to accomplish the object aimed at, namely, to present in a pleasing, simple form, the general outlines of the study so as to instruct and interest without confusing the youthful mind.—*Eastern Townships Gazette and Shefford County Advertiser.*

It has many novel features, some of which are decided improvements. The conversational manner in which the lessons are written, is likely to interest the beginner, and impress them on the memory. We hope the work may meet with a favorable reception from our teachers.—*Sherbrooke Gazette.*

It is a valuable addition to the useful series of school books published by Mr. Lovell, and which should be generally introduced into the schools of the Province.—*Stanstead Journal.*

Mr. Lovell is justly entitled to much praise for the very enterprising manner in which he undertakes to supply our youths with books of the most comprehensive and instructive description. We would advise the various boards of school trustees in North Welling-ton to recommend its use in their respective school sections. It should be placed in every child's hand, in every school in Upper Canada. For simplicity and comprehensiveness it surpasses any work of a similar kind hitherto published in this Province.—*British Constitution, Fergus.*

The work is one evidently of great care and labor, and we know of no better book on the subject of which it treats, so well calculated to assist the youth of the country. The publications of Mr. Lovell are destined to effect a world of good in this country—many of them are specially adapted to the instruction of the youth of Canada—they all make us know and love Canada the better, and enable us more correctly to understand her true position (not in a geographical sense alone) on the map of the world.—*Whitby Chronicle.*

We can recommend it as being an excellent introduction to the General Geography already issued by the same publisher. The work is neatly got up and the arrangement of the matter well suited to beginners. We trust it may receive the patronage it deserves.—*Quebec Advertiser.*

This work is written in a very familiar style and liberally illustrated with outline maps and woodcuts, and will be found a very valuable contribution to our means of instruction in schools. The character of the author of "Easy Lessons," who manifests an intimate knowledge of the wants of the young, is a guarantee that it is a book that will take hold of the youthful mind, and interest and delight it, and we have much pleasure, therefore, in hesitating for it a speedy and general adoption as a juvenile class book in our schools in this section of the country.—*Onemee Warder.*

We have carefully examined this work, and give it our unqualified approval. We should have pleasure in seeing Morse expelled from all our schools, and Mr. Hodgins' correct and impartial geographical works occupying its place.—*Quebec Herald.*

This work is intended as introductory to "Lovell's General Geography," the most useful work ever published in Canada. It is so coaxing in its manner, and so winning in its illustrations, and the singular attraction of its maps, pictures and details, that young persons, we doubt not, would sooner peruse it than any mere tale of amusement. It is very beautifully got up.—*Galt Reporter.*

It is admirably adapted for those pupils beginning the study of geography. Having gone through the "Easy Lessons," "Lovell's General Geography" will

be easily mastered, both of which works are creditable to Canadian enterprise. We bespeak from school teachers and trustees an examination of these works issued from Mr. Lovell's press.—*Dumfries Reformer.*

A knowledge of geography is of the greatest importance, and that system which most easily, efficiently, and cheaply gives us this is of the greatest value. Mr. Hodgins' incomparable little book accomplishes all this, and is very interesting besides. Most art, it does he while his young pupils into the practical object of geography, by his "Conversational Trip over Land and Water." In conclusion we would advise all teachers to procure this book immediately, if they have the interests of their pupils at heart.—*York Herald, Richmond Hill.*

It is just the thing wanted at the present time, as it is designed as an introduction to "Lovell's General Geography." It must be of incalculable benefit to the youth of the country, and we trust no time will be lost in introducing it into our schools, as it is purely a Canadian work and gives proper prominence to Canada and the other British possessions on this continent, which Morse's one-sided affair does not.—*Grand River Sachem, Caledonia.*

It is an admirable work, and we heartily commend it to the attention of Canadian school-teachers.—*South Simcoe Times.*

A new and valuable little work on Geography well adapted to the use of schools.—*St. Mary's Argus.*

Well adapted as a rudimentary work for young geographers. It is designed as introductory to the "General Geography," now universally adopted in the Canadian Schools.—*Canadian Post, Lindsay.*

To obviate a sort of objection to the larger, and first Geography, so well known, Mr. Lovell has again had recourse to the talented aid of the Deputy Superintendent of Common Schools, and has now published a smaller, readier, and easier school book, more adapted for beginners, and in every way calculated to be an admirable aid to the teacher, and a necessary excellent guide and friend to the young scholar. Altogether it is a school book much needed, and it and the larger one will soon be the only Geographies in our Common Schools.—*Cayuga Sentinel.*

The plan of the work is certainly good, being well calculated to fix the names of places on the minds of the pupils. We hope to see this work extensively used in our schools, as it will be found of great advantage to young beginners—while it will exhibit a just appreciation of the author's endeavors to furnish a purely Canadian series of school books.—*Waterloo Chronicle and Gazette.*

We sincerely hope Mr. Lovell will continue his laudable work in the interest of the schools in this country until every book used in them shall bear the impress of Canadian talent and enterprise. We very cheerfully commend this book to the attention of all parties concerned in the education of the young.—*Essex Journal.*

The "Easy Lessons" will be found to be of very great use to young beginners, before commencing the study of the "General Geography." The illustrations are well executed, and will render the work particularly interesting to the junior pupils. It is not only a valuable work, but it is entirely Canadian, which should entitle it to be received with favor in our schools.—*Markham Economist.*

An excellent and appropriate addition to our Canadian school books. On the whole it is just such a book as was required.—*Woodstock Sentinel.*

We think Mr. Hodgins deserves great credit for the admirable manner in which he has got up this work, while the publisher, Mr. Lovell, has fully sustained his long since acquired reputation as a first class book printer. We hope to see this Geography immediately brought into general use in our schools.—*Berlin Telegraph.*

Just the book required by the beginner in the study of geography. We would recommend it to school teachers throughout the country.—*Canadian Statesman, Bowmanville.*

A more useful and interesting work could not be introduced into our schools, for the use of the junior classes.—*Enterprise, Collingwood.*
